Stud finder

Use a stud finder to locate studs when positioning shelving. Loop **STRAPS (L)** around rear poles (horizontal) or rear of upper shelves (vertical). Mark the installation points through the holes in the strap with a pencil before installing.

For safe mounting, secure wall straps to wood studs whenever possible. Avoid water or electric lines when securing shelf to wall.

Caution

Place heavier items on the lower shelves and lighter ones on the top. Do not stand or climb on the shelving system. Do not drop heavy items on the system. Do not move the system while loaded. Always check that wheels are screwed tight before moving. Replace worn or damaged wheels immediately.
