Workcenter Island (Model No. 20109B)

NOTE: We recommend TWO people to assemble the workcenter.

Step 11: Install (#20) Small Drawers into Workcenter

1). Pull out the side rails of the drawer bracket, all the way to the front.

Note: After pulling out each rail, make sure all the ball bearings of the rail are visible and pointing completely outward to the front.

2). Line up the inner rails on both the Small Drawer Left Panel and Right Panel to the fully assembled drawer, drag drawer with both hands and push the drawer slowly at the same time to lock in place.

Repeat Step 11 for second drawer Installation.

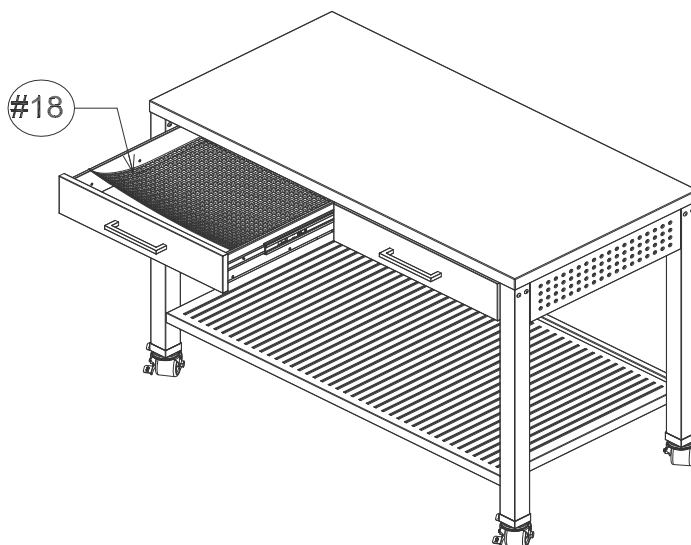

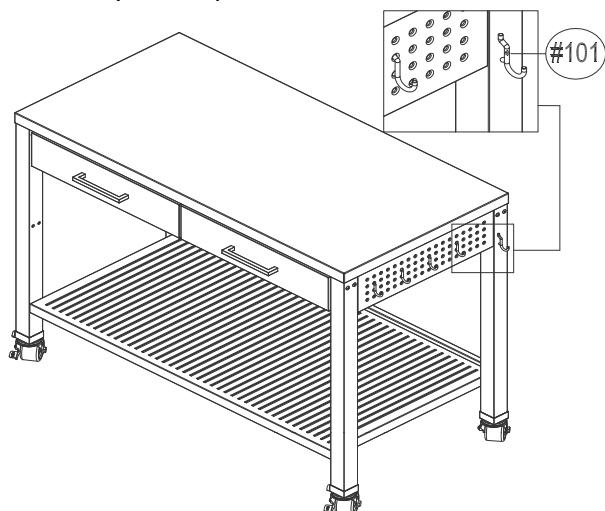

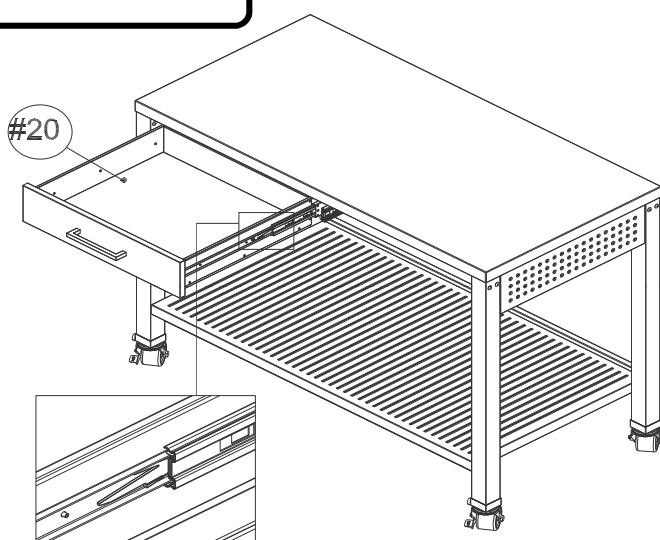

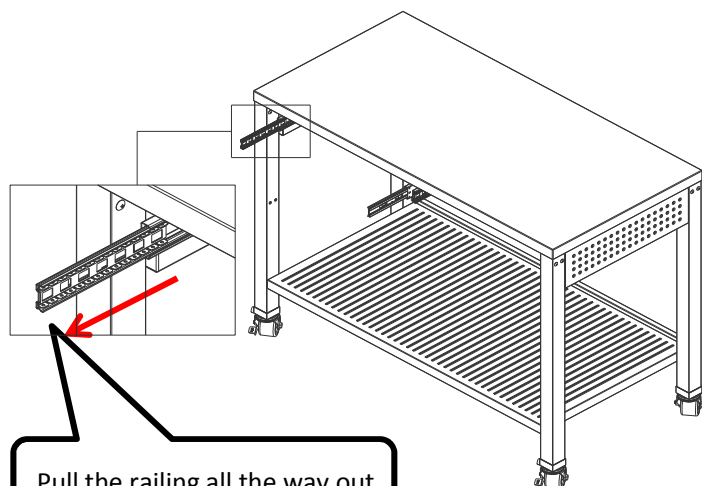

Step 12: Place Drawer Mat (#18) into Drawers

Pull out (#20) Small Drawers ,place mat(#18) in each drawer.

Step 13: Install (#101) 1" Hook

As shown in the picture, hang (#101) 1" Hook on holes to both sides of the Side Pegboard Panels .

Assembly is Complete.

Workcenter Island (Model No. 20109B)

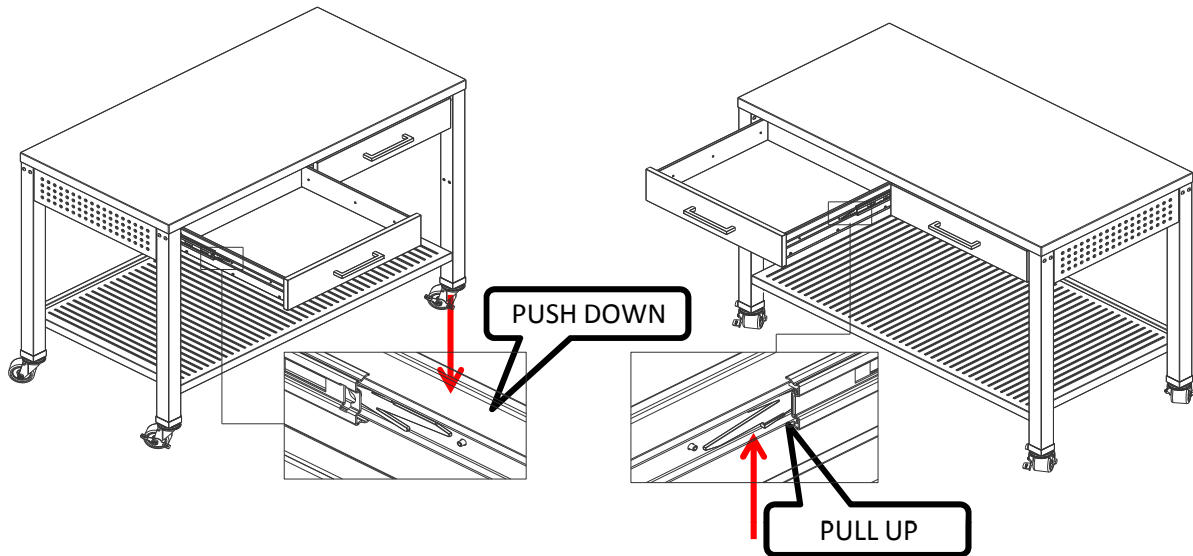

NOTE: We recommend TWO people to assemble the workcenter.

How to pull drawer out of the unit?

To pull drawers out of the unit, simply pull the black plastic clip on the right side of the drawer up, then push on the black plastic clip on the left side of the drawer down. Now you can pull the drawer out.

Total Weight Capacity Evenly Distributed	Weight Capacity per Shelf Evenly Distributed	Weight Capacity per Drawer Evenly Distributed
500 lbs. (226.8 kg)	100 lbs. (45.36 kg)	30 lbs. (13.6 kg)

Stainless Steel Maintenance:

These parts have UltraGuard fingerprint resistant finish. Do not use traditional stainless steel cleaners on this unit. Lightly wipe off once a month with clean warm water and a soft cloth (preferably a micro fiber cloth). This is the safest formula to prevent new stains from appearing over time and manage unwanted fingerprints or grease marks. Remember to always wipe in the direction of the surface grain (NEVER ACROSS) and always use a lint-free cloth. Once the surface is clean, thoroughly wipe dry with a soft absorbent cloth.

Wood Top

Although great care is taken to hand select consistent wood top color and grain for products, there can and will be natural variations in color and graining between finished products. These variations contribute to the beauty of using a natural material as a workbench and are considered standard quality. Variations of color within these standards and minor scratches in the clear coat finish will not be a reason for replacement. If the wood top is received with excessive damage or splitting, Seville Classics will guarantee replacement of the wood top.

Restore Shallow Scratches or Chips

If the wood top becomes scratched and chipped over time or during assembly, a Polyurethane finish can be applied to help restore the wood's natural texture, as well as protect the surface from future damage.

Applying a Polyurethane Coating

Please follow the manufacturer's instruction on the product for application.
