

Advance your practice with skin microbiome science

Click on the links below to watch the recorded webinars

Trevor Steyn
Esse Founder and
Skin Microbiome Scientist

THE SKIN MICROBIOME Webinar Series

These recorded sessions features Trevor Steyn, a pioneering expert in skin microbiome science, whose insights continue to shape this rapidly evolving field. As the founder of Esse Skincare, Trevor was an organic chemist and visionary who brought years of experience and an innovative approach to microbiome-based therapies. This webinar series forms part of his legacy, offering valuable knowledge and perspectives to support and advance your practice.

[Medical Aesthetics and the Skin Microbiome](#)

Delve into the skin microbiome and its role in skin health and aesthetic treatment outcomes. Explore the latest research on the microbiome, biotherapeutics, and biotech actives, and how they support skin integrity and optimal treatment results.

[Acne and the Skin Microbiome: Strategies for Sustainable Skin Health](#)

Explore acne through the lens of the skin microbiome, examining microbial imbalances that contribute to acne and how a biotherapeutic approach can help restore balance for effective, long-term results.

[Restoring the Skin Barrier with Biotherapeutics: A Microbiome Approach](#)

Explore the critical role of biotherapeutics in restoring the skin barrier, with a focus on leaky skin and its link to conditions like eczema, psoriasis, and ageing. Learn how inflammation, skin thickness, and modern treatments influence long-term skin health.

Deidre Denoon
Esse Education Aesthetic Specialist

ADVANCING AESTHETIC PRACTICE THROUGH MICROBIOME SCIENCE Mini-Series

These recorded sessions features Deidre Denoon as she explored how a microbiome-first approach can enhance treatment outcomes. This mini-series demonstrates how biotherapeutics and advanced biotech actives can support recovery, rebalance acne-prone skin, and strengthen barrier function for healthier results with fewer side effects.

[Healing and Recovery with the Microbiome](#)

Explore how live probiotics and advanced biotechnological ingredients can prepare the skin, accelerate post-treatment recovery, and integrate microbiome science into aesthetic protocols to enhance client results.

[Acne Solutions through Microbiome Science](#)

Examine the microbial imbalances underlying acne and discover how biotherapeutic, microbiome-focused approaches can rebalance the skin for clearer, healthier results with fewer side effects.

[Biotech Strategies for Sensitive and Ageing Skin](#)

Explore how microbiome science and targeted biotech formulations can address inflammation, barrier dysfunction, and ageing, offering effective strategies to soothe sensitivity and improve treatment outcomes.
