

BASSTAT TATTOO PEN

INCLUDED IN BASSTAT KIT

Basstat electric pen

Charger

Two ink wells

Three needles

Bass Ink

Once your Basstat is charged install the needle of choice. Insert the needle carefully into the end of the pen and tighten by turning clockwise. You can adjust the needle depth by turning the end of the pen, below the blue ring. Clockwise increases depth, counter clockwise decreases the depth.

To turn your Basstat pen on press and hold the silver button until it starts to run. Once the Basstat pen is running the speed of the needle can be slowed down by pressing the same silver button once. There are four speed settings.

To begin tattooing secure the rabbit by wrapping in a towel. Expose the left ear. If needed you can use a marker to stencil your tattoo and trace using the Basstat pen. Dip the needle into the ink and begin the tattoo.

Once the tattoo is finished wipe excess ink from the tattoo. Touch up as needed.

Be sure to clean your Basstat after each use. Clean the needle by running the needle in a small amount of alcohol.

We appreciate your Business! Enjoy your new Basstat!
