MORE DETAILS IN THE PRESCRIPTION GUIDE

VIE COLLECTION TREATMENT SERIES

What objectives?

FOR WHO?

For your clients who are looking for maximum anti-aging results. Adapted to the needs of each client, they are designed as an alternative to esthetic medicine, to extend the time between sessions and maintain results.

WHEN?

Over a period of 1 month. They include treatment room facials and beauty routines to be performed at home in order to optimize the benefits of the treatments received.

HOW?

This new ultra-personalized approach allows each client to be accompanied throughout the duration of their treatment.

This personalization begins with a detailed skin diagnosis (skin exam) followed by an expert anti-aging prescription (prescription chart).

4. DÉCOLLETÉ MASSAGE	11
Eye contour massage	
5. EYE CONTOUR MASSAGE	12
3-DIMENSION EYE - EYE TARGETED TREATMENT	

I. INITIATION

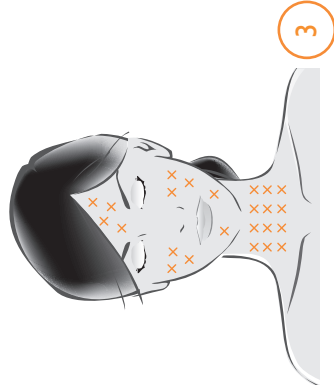

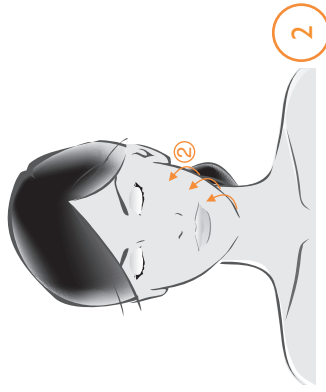

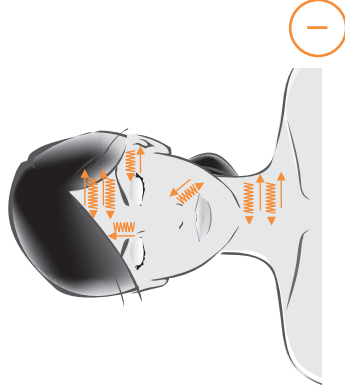

During Step I, make-up removal

Apply Instant Cleansing Milk or Cleansing Gel, working in circular movements zone by zone, and conclude with thumb pressures in the following order:

1. The décolleté: pressure in the centers of the pectoral muscles (in line with the nipples).
2. The neck: with one thumb over the other, pressure under the hollow of the clavicle junction.
3. The facial contour and jawline: pressure on the TMJs.
4. The lips: pressure in the middle of the chin crease and another simultaneously under the nose.
5. The cheeks: pressure in the middle of the cheekbones.
6. The nose: pressure next to the outer edges of the nose.
7. Around the eyes: pressure on the inner portion of the eyebrows.
8. The forehead: pressure on the temples.

2. ACTIVE MOVEMENTS

During Step 5

Apply the appropriate concentrated solution and perform the movements below (paying particular attention to the areas identified during the Skin Exam):

3-DIMENSION WRINKLE:

On the upper part of the face: with the thumbs and forefingers, perform anti-wrinkle pinches, then kneading and pressing on each identified wrinkle. (Figure 1)

On the lower part of the face: perform localized anti-wrinkle pinches on the cheeks, lip contour and neck.

- Continue with kneading, fan strokes and/or vigorous alternating paddling movements with finger pads on the jawline. (Figure 2)

PRO-COLLAGEN:

On areas prone to skin slacking: deeply pinch the tissue between the thumbs and fingers to make a “duckbill”.

- Perform fan strokes and vigorous alternating paddling movements with finger pads. (Figure 2)
- Continue with “kneading rolling” along the jawline.

MÉSOFORCE:

- Perform tapping movements and alternating Jacquet pinches on the whole face, first on one side then the other: (Figure 3)

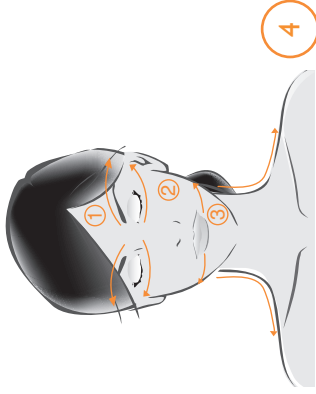

2. ACTIVE MOVEMENTS (CONTINUED)

During Step 5

Apply the appropriate concentrated solution and perform the movements below (paying particular attention to the areas identified during the Skin Exam):

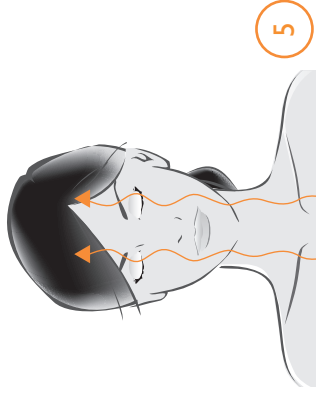

MELA BRIGHT:

- Perform alternating «jacquet» type pinches on the whole face, first one side then the other. (Page 5, Figure 3)
- Next, with the thenar eminences, perform deep gliding, smoothing strokes, starting with the forehead, then the cheekbones and along the upper jaw, from the center outwards, and finish by smoothing along the neck, towards the ganglion area, above the clavicles. (Figure 4)

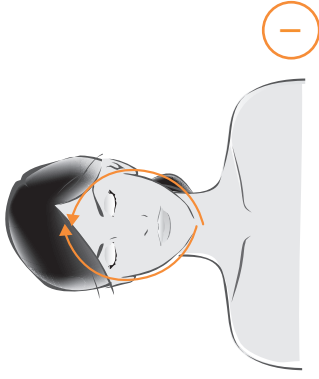

ROSA CONTROL:

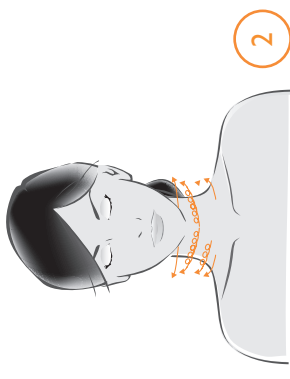

- Perform tapping movements over the entire face and neck.
- Then moving from the center of the face, working outward, use flat hands to perform pressing pumps on each area of the face.
- Conclude with smoothing vibrations, working from the bottom of the face to the top. (Figure 5)

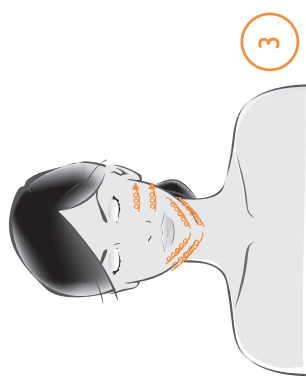

3. EXPERT ANTI-AGING MESSAGE (1/4) - 12 minutes

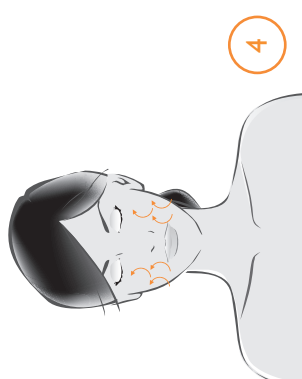

1

2

3

4

During Step 6

Using Dermo-Stimulating Massage Cream. Perform each movement twice.

Introduction:

1. Make contact by smoothing the décolleté, the shoulders, and the trapezius muscles.
2. With fingertips, starting from the chin, simultaneously smooth around the face with each hand moving toward the opposite cheek. (Figure 1)

Skin Awakening:

3. Use flat hands to smooth the skin in an upward direction from the base of the neck to the jawline and return (one round trip).
4. With the index and middle fingers, perform simultaneous spirals on the neck from the middle to the outside along 3 different lines (bottom, middle and top of the neck). Conclude by pushing down towards the ganglion area (once). (Figure 2)
5. With closed fists, make spirals from the center of the face outwards along 4 different lines. Start the 1st line under the chin along the jawline. Repeat along 3 different lines. (Figure 3)
6. With closed fists, thumbs inside, use the inner edge of the hands to make quick, comma-like strokes across the whole of the cheeks and the jawline. Then, using the thumb and index finger (fists still closed), perform pinches in the same manner over the same area. (Figure 4)

Lips:

7. With the thumb and forefinger, perform anti-wrinkle pinches around the lips, moving from one corner to the other, then smooth to return.
8. Perform toning, alternating Jacquet pinches on the lips and the lip contour.
9. Between the index and middle fingers, smooth the lips up towards the TMJs (Temporo-Mandibular Joints) and finish with a simultaneous circular pressure on the TMJs. After the second time, smooth both sides of the neck, around the shoulders, the trapezius muscles and nape.

Turn the head towards the left.

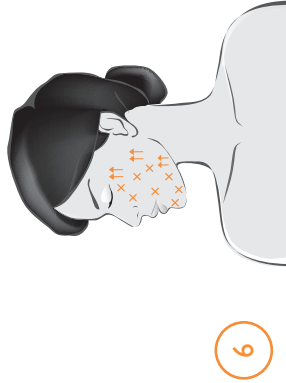

3. EXPERT ANTI-AGING MESSAGE (2/4) -12 minutes

The head is turned to the left side for maneuvers 10 to 15.

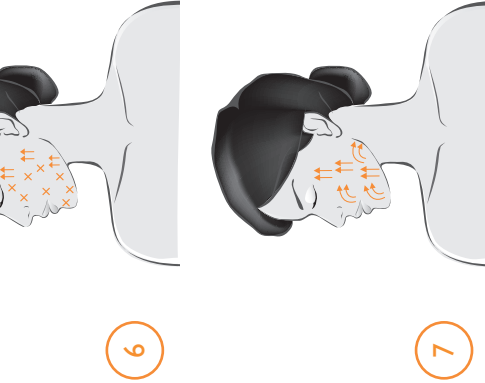

Lower face/cheeks:

10 a. Pressing with the whole palm of the hand, start with alternating smoothing strokes, moving from the jawline to the cheekbones, gradually increasing the speed.

10 b. With the index and middle fingers, continue these alternating smoothing strokes in a line in front of the ear, gradually increasing the speed. (Figure 5)

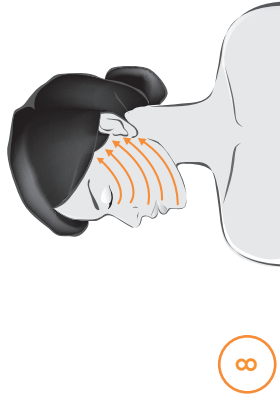

11. Continue with one hand tapping with the pads of the index, middle and rings fingers, and the other hand performing toning Jacquet pinches with the thumb and index or middle finger, move over the whole cheek. (Figure 6)

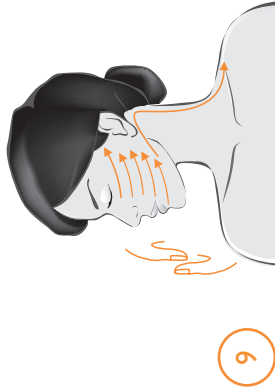

12. Next, with one hand make fan strokes, while the other hand continues to piano tap with the finger pads (Figure 7)

Move to the side so that you are facing the client.

13. With the thumbs and index fingers simultaneously, perform “kneading rolling” on the cheek, moving from the center of the face to the ear following 5 lines (once each). (Figure 8)

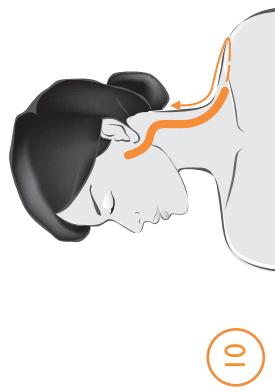

Move to the other side.

14. With the thumbs one above the other, continue gliding along 5 lines across the cheek from the center outwards. At the end of the 5th line, drain along the carotid artery towards the base of the clavicle (perform once). (Figure 9)

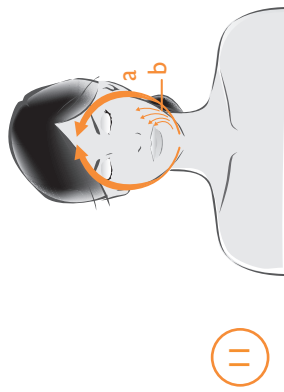

15. Next, with the heel of the external hand, start in front of the ear and glide down the outside of the neck, along the carotid artery, to the shoulder. Glide around the shoulder; then return along the trapezius muscles to the nape. (Figure 10)

Rotate the head to the right and reperform maneuvers 10 to 15 on the other side. Then straighten the head.

16 a. With the fingertips, perform alternating cross strokes, starting from the chin towards the opposite cheek and finish on the forehead with the palms of the hands in a pressed smoothing stroke.

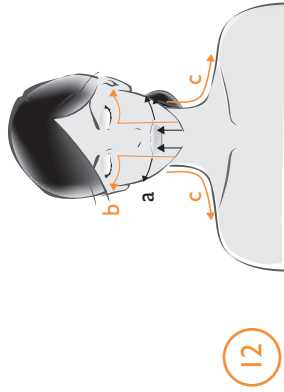

b. Repeat the same movement in a more dynamic way, i.e. alternating crossed strokes with the fingertips, ending on the cheek with a lifting movement (fan type). (Figure 11)

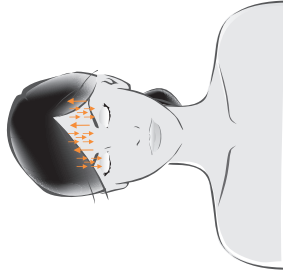

17 a. With the thenar eminences, starting from the chin, move up to the corners of the mouth then stretch across the cheeks to the ears.

b. Then, from the chin, move up the nasolabial folds and stretch the length of the cheekbones towards the temples, then down the neck.

c. Glide around the shoulders and return to the nape. (Figure 12)

3. EXPERT ANTI-AGING MESSAGE (4/4) - 12 minutes

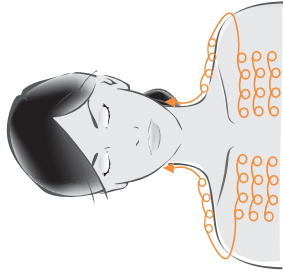

Upper face:

18. With the index and middle fingers, start from the nape, smooth up towards the temples and trace figure-eights in this area.
19. Knead along one eyebrow, starting at the outer tip and crow's feet. Continue across the third eye and along the other eyebrow. With the thumbs and index fingers, return with alternating toning pinches (one round trip).
20. Between the index fingers, twist the frown lines.
21. With flat hands, move up the forehead in a V shape stretching towards the hairline.
22. With the thumbs, perform small dynamic rubbing actions on the forehead, moving down from the hairline to the eyebrows, then smooth back up. Repeat, starting from the middle of the forehead towards the temple and move back and forth. Then perform the same rubbing sequence on the other side of the forehead. (Figure 13)
23. With the thenar eminences, finish by stretching from the center of the forehead towards the temples along two different lines (lower part then upper part of the forehead).

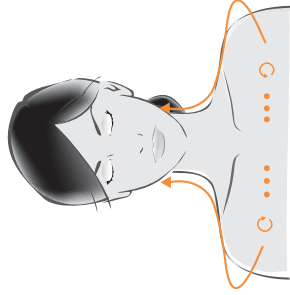

Final:

24. With the flat of the hands, perform large, toning, alternating strokes, starting from the décolleté and gradually moving up to the forehead (from inside to outside), first on one half of the face, then on the other.
25. With the fingertips, simultaneously circle the face in opposite directions, then conclude with a smoothing stroke of the décolleté (identical to movement 2 - Figure 1.)

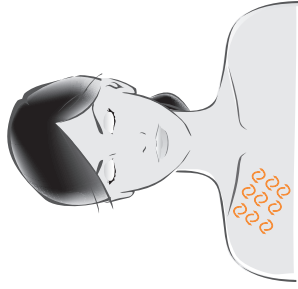

4. DÉCOLLETÉ MASSAGE

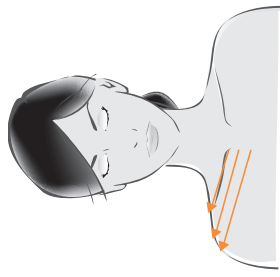

1

2

3

4

(During Step 7)

With Mesopeptide Décolleté Replenishing Cream, while the mask is working.

1. With closed fists, make circular movements on the décolleté, from the sternum to the shoulders in 3 lines. Smooth the shoulders, then with closed fists, make circular movements along the trapezius muscles to the nape. (Figure 1)
2. With the thumbs, apply 3 circular pressures, from the sternum to the armpits, then with the knuckles, perform a circular massage on the armpit crease. With flat hands, finish by smoothing the trapezius muscles and the nape. (Figure 2)

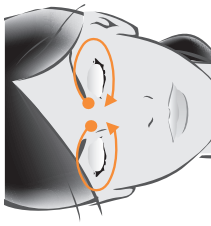

Position yourself to one side of the client and work on the opposite side of the décolleté:

3. With the thumb and other fingers, perform deep «duckbill» pinches.
4. Perform “kneading rolling” along 3 lines, from the center of the décolleté to the opposite armpit.
5. Make wide twists between the index and middle fingers of each hand, from the center to the opposite armpit. (Figure 3)
6. With the flat of the hands, finish with alternating deep smoothing strokes, from the center of the décolleté to the opposite shoulder. (Figure 4)

Change sides and perform maneuvers 3 to 6 on the other side of the décolleté.

5. EYE CONTOUR MASSAGE

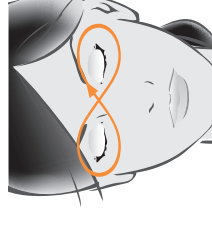

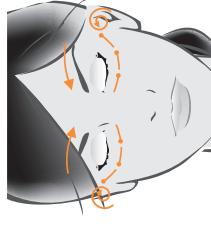

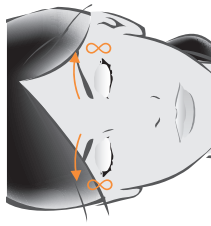

3-DIMENSION EYES - 12 MINUTES

Perform each movement 3 times.

1 : MASSAGE USING 2 PENS SIMULTANEOUSLY - 4 minutes

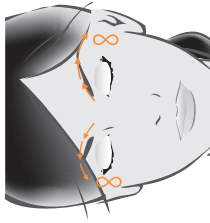

1. Draw circles around the eyes with the pens, then finish by applying pressure to the inside of the eyebrows.
2. With the flat sides of the pens, make smoothing strokes along the eyebrows, then continue by drawing figure-eights over the crow's feet.
3. Use a pumping technique under the eyes working from the inside out, and end with circular pressures over the crow's feet.
4. Using both pens together, draw an 8 around the eyes.

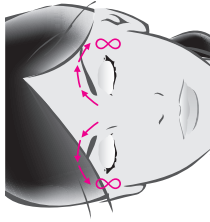

5. EYE CONTOUR MASSAGE

3-DIMENSION EYES (CONTINUED) - 12 MINUTES

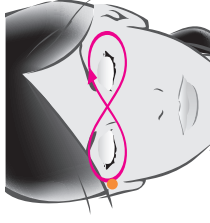

1.a

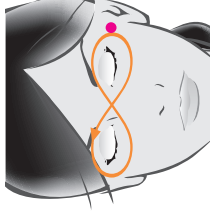

1.b

2.a

2.b

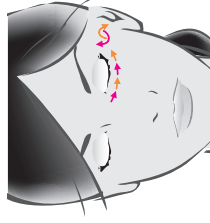

Legend:

Pink: Pen

Orange: Fingers

3

Perform each movement 3 times.

Dampen the pens in fresh water and then dry, if necessary.

2 : ALTERNATING MASSAGE: HANDS/PENS - 3 minutes

- 1 a. Hold the pens in your hand, and use the thumbs to make short alternating smoothing strokes on the eyebrows, from the inside out. Then, draw figure-eights on the temples with the thenar eminences.
- b. Repeat the same movements using the 2 pens.

- 2 a. Alternately, draw a full figure-eight (glasses) with one of the pens while the other hand remains on the opposite temple.
- b. Then, make the same figure-eight using the index and middle fingers while the pen remains on the other temple.

3. Move to the side of the face: alternately stroke the under-eye area with index and middle fingers of one hand and the pen in the other, working from the inner corner of the eye to the temple. Make twisting movements with the index finger of one hand and the pen in the other over the crow's feet area. Follow with "kneading-rolling" over the crow's feet area using thumb and index fingers.

3 : FREEFORM MANUAL MASSAGE - 1 minute

Perform a freeform manual massage then end by smoothing the eyelids and under-eye area with the pads of the fingers.

4 : CONCLUSION - 4 minutes

Repeat the movements in Step 1.
