

## Hydraulic Cylinders

- TR2.5 Series Hydraulic Cylinder SAE & NPT Port combinations offer flexibility & advantages over our competition
- CL Series offers a welded cylinder to upgrade your existing tie rod application
- Solutions of innovative manufacturing oriented towards the needs of the client
- Manufacturing customized solutions adapted according to the speed, quantity and desired price - custom cylinders available upon request

## Motors

- Rolls in the Geroller set act as a roller bearing and reduce friction
- Provides smoother performance especially at less than 100 RPM
- Improved mechanical and volumetric efficiency
- Reduces wear in systems with low fluid viscosity
- Optimized drive running angle
- Easily interchangeable with other motors
- Extended motor life

## Valves & Manifolds

- High performance screw-in Cartridge Valves and Manifolds for 20 years
- Compact design & fewer leak points result in a lower cost better hydraulics solution
- Manifolds conceived, designed and manufactured in the US
- Tested to our high standards
- Standard and Customized solutions available

## Hydraulic Pumps

### Gear Pumps

- Fixed displacement in standard and custom configurations available

### Vane & Piston Pumps

- Fully adjustable flow & pressure compensation vane & piston pumps
- Low noise, quick response & steady operation
- High efficiency, low temperature & energy saving design
- Adjustment screws for both pressure setting & max flow
- Durable, long life, low volume & small footprint (space saving)

## Power Units

- Choice of configurations of multiple components such as pumps, valves, motors and tanks
- Power units can be fitted with blocks manifold designed to your specifications and assembled at the US factory
- Car Lift (ETL Certified)
- Snow Plow
- Scissor Lift
- Tail Gate
- Wheel Chair and Medical
- Dock Leveler
- Dump Trailer
- Lift Table
- RV
- Tipper Trailer

## Solenoid Valves

- Interchangeable with CETOP and ISO Valves on the market
- Boltkit & DIN Connectors with LED included
- CSA, UL and CE Proof
- Wide variety of spool models & voltage available
- Softshift valves available
- Internal pilot, external drain setup
- Easy to modify
