

ALUMINUM EXTRUSION

TURNKEY ALUMINUM EXTRUSION CAPABILITIES

From concept to creation we have worked on large scale projects with high quantities to smaller, single unit builds. There's a reason we've been awarded top distributor of 80/20 products - let us show you why!

About What we deliver....

As a premier integrator for 80/20 we solve business challenges and requirements by providing engineering, machining and assembly services. From custom CAD designs to kits, TECO Aluminum Extrusion Division has the experience and engineers to expertly frame, mount, enclose, shield, lift, move or display using the newest and most cost-effective assembly techniques.

We have a team of 80/20 Design Engineers with state of the art production facilities and warehouses throughout the West Coast. Call us today at **866-889-TECO** or send an email to 8020@tecotechnology.com and learn why TECO is the preferred partner for so many manufacturing companies.

Services

Advanced Engineered Solutions

As a full-service distributor of the industry's most comprehensive aluminum extrusion family — 80/20, we offer local inventory, an experienced staff of CAD designers, in-house machining, digital panel cutting, full assembly/manufacturing and on-site delivery/installation.

- Engineering & Design
- Custom Machining
- Panel Machining
- Custom Packaging
- Standard Machining
- Material Handling
- Linear Motion
- Capital Equipment Design, Build and Integration
- Safety Enclosures & Machine Guarding
- Electrical Box Builds, Assembly & Testing
- Workstations
- Climate Control Enclosures
- Robotic Work Stations
- Machine Framing

01 Fabrication

We offer a range of fabrication capabilities including CNC machining, precision cutting and mitering to size.

02 Kitting, Assembly & Pack

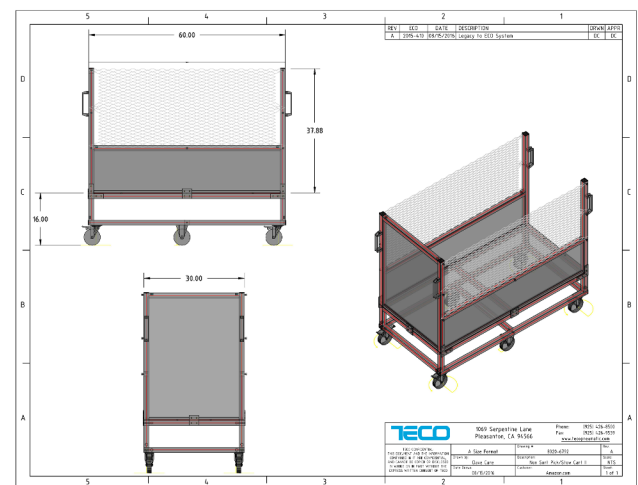

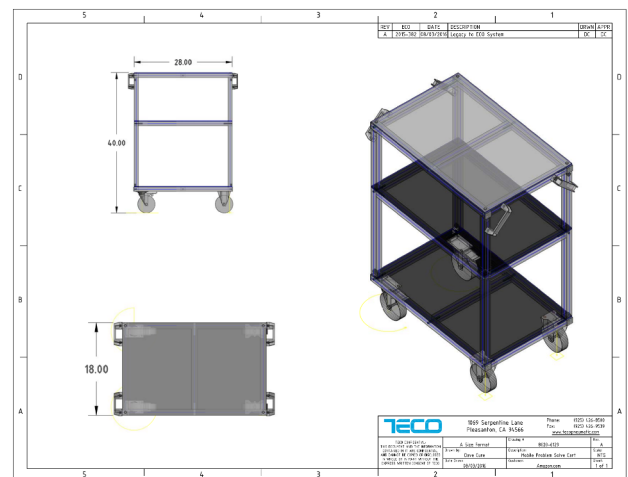

We support various partial or finished component assembly, packaging and supply configurations

03 Custom Aluminum Extrusion

With state-of-the-art aluminum extrusion systems we produce tighter tolerances, consistent quality and better finishes for your custom extruded aluminum shapes.

04 Long Part Profile Machining

Our long bed CNC equipment can machine aluminum profile sections up to 20 feet in length in one operation, dramatically reducing machining time.
