## ROBOTIC SOLUTIONS WITH KASSOW COBOT

The 7-axis Kassow Cobot is part of the Bosch Rexroth family. A cobot, or collaborative robot, is an industrial robot that can safely operate alongside humans in a shared workspace. Their 7th axis gives the Kassow Cobot the highest degree of freedom. The cobot's arm mimics the dexterity of the human arm enabling it to reach around corners.

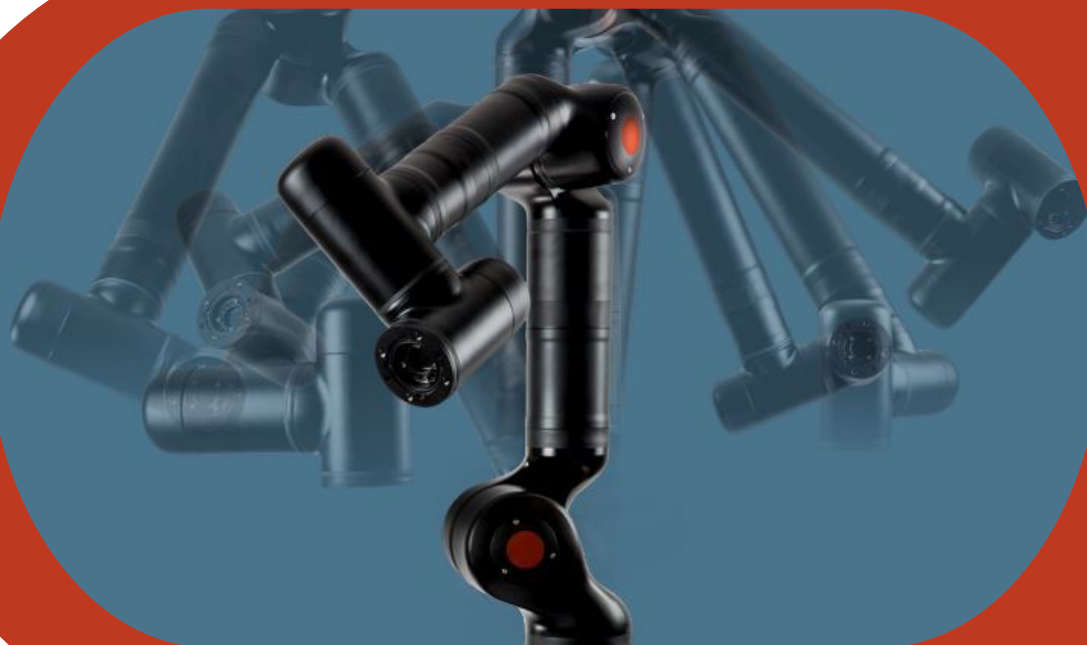

# Reach every corner with 7 axes

Every cobot made by Kassow Robots has a **7th axis**. This offers a ***greater range of motion, increased payload capacity, improved precision***, all with ***advanced safety features***.

- 7 axes
- Lightweight robots
- Payloads up to 40 lbs
- Reaches up to 70 inches
- Speeds up to 225 degrees per second
- Edge Edition with controller in base for minimal footprint

***Perfect for human-robot collaboration***

# Advanced Engineered Solutions

TECO offers complete Robotic Solutions for your specific applications.

## Applications

- Packaging
- Palletizing
- Pick & Place
- Assembly
- Dispensing
- Labeling
- Material Handling
- Mobile (AGV/AMR)

01

## Engineering Services

- Robot Selection & System Design
- Support Safety Integration
- Standard & Customize End Effectors
- Supply Infeed / Outfeed Conveyors
- Programming, Assembly & Commissioning
- Cobot Demonstrations & Training

02

## Integration

Take **Palletizing** for example, TECO will address changing setup for short/varied production runs, as well as provide standard and customized end effectors. **Delivering the solution you want.**

03

## Components

From End of Arm Tooling to cable management and Tool Changers to custom tables/carts - TECO has your complete solution.
