

JK-RCAS Flip-Down Attic Shelf (JK) 2007-2018

I N S T R U C T I O N S

In-the-Box:

(1) Flip-Down Attic Shelf

(2) Left and Right mounting Brackets

(3) 4 - M6 Bolts and 2 - Spacers

Tools Needed:

If installing an
Cargo Tray the
same time as
the Attic Shelf.

1

Step 1: Locate Bolt Holes on Roll Bar

Inspect the underside of the roll bar to find the threaded bolt holes.

Note: Factory bolts may be present. If so, remove them before proceeding.

Step 2: Installing Driver Side Attic Bracket (A) (If You Purchased Both the Attic Shelf and Cargo Tray)

Install the Attic Shelf bracket (A) first by aligning and securely mounting it according to its installation instructions. Once it is in place, install the Cargo Tray bracket.

Note: The Attic Shelf bracket must be installed before the Cargo Tray bracket to ensure proper alignment and fit.

Step 3: Installing Bracket (B) (Passenger Side)

Repeat Steps 1-2 for installing the brackets on the passenger side.

Step 4: Install the Driver Side of the Tray

Carefully place the tray into the back of the vehicle, aligning the hinge of the tray with the pin on the driver side Attic Shelf Bracket. Be sure to place the spacer onto the pin before inserting the tray—this step is essential for proper fit and function.

Support the passenger side of the tray during installation, and ask a friend to assist you to ensure stability and ease of alignment.

Step 5: Secure the Passenger Side of the Tray

While your friend continues to support the tray, place the spacer onto the pin on Bracket B. Once the spacer is in place, carefully align the Bracket B pin with the passenger side hinge of the tray.

After both sides are properly aligned, tighten all M6 bolts on the underside of the roll bar to eliminate any movement.

Important: Check that the tray latches properly. If the latch feels tight or doesn't engage smoothly, loosen the brackets and make minor adjustments. When correctly installed, the tray should latch easily and securely.
