THE BASICS

The app provides a bundle of features. See below some of the basics so you can get the best out of your camera.

Viewing the camera and using the pan, tilt, zoom.

On the app homepage, click on your camera. You are now viewing a live stream of your camera.

Change quality to high definition

Full screen view

Unmute cameras audio

Take a screen capture

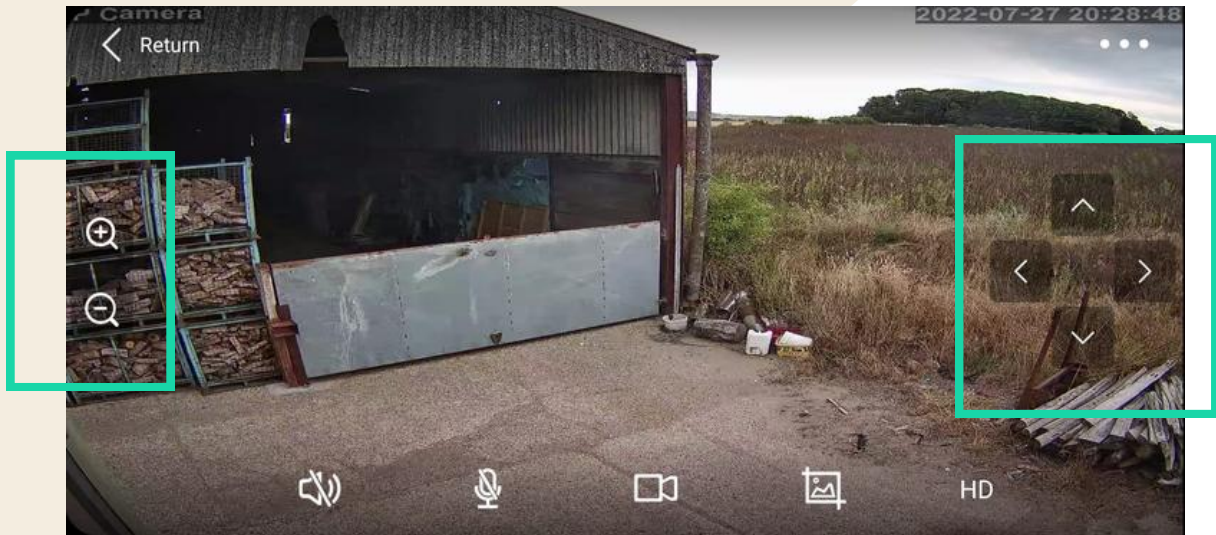

Start recording livestream

Unmute phone audio and speak through camera speaker.

Ensure you change to HD mode for the best viewing quality.

THE BASICS

To pan or tilt the camera you can slide your finger on the screen in the direction you wish to move the camera.

Or you can use the direction buttons on the full screen mode. You can also find the zoom buttons here.

You can also swipe through the controls at the bottom of the screen to find control buttons while in portrait mode.

SETTING THE TIME

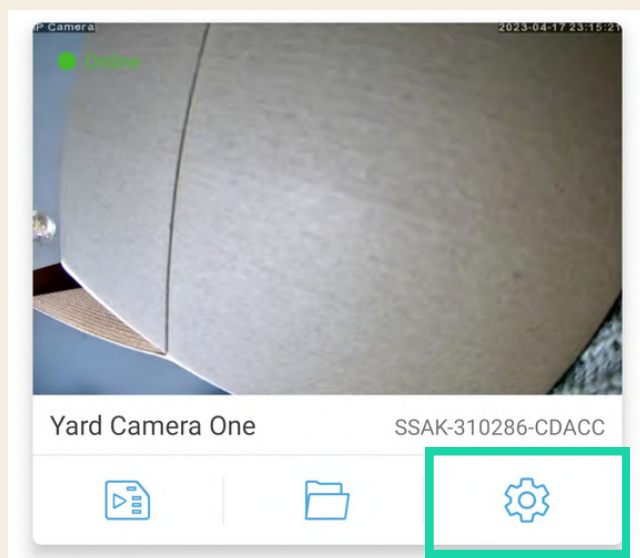

Important Setting

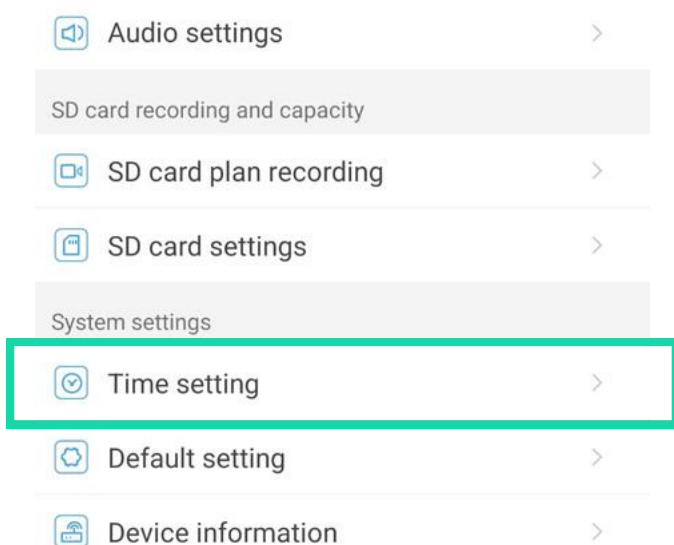

Setting the correct time.

If you do not change the time zone on your camera, it will cause issues with recordings. If the time zone is not set, your camera will not record correctly.

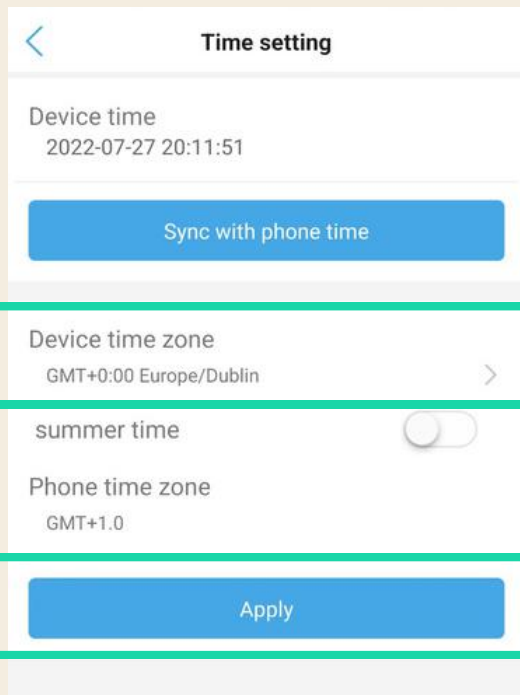

A. Navigate to your camera's settings by clicking the settings cog.

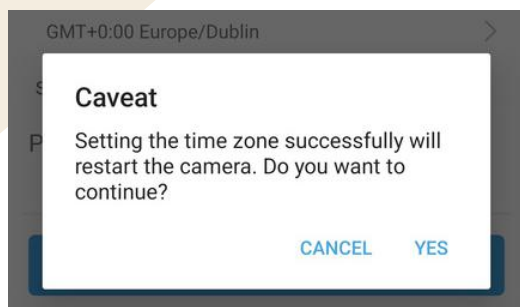

B. Scroll down and select 'Time Setting'.

SETTING THE TIME

C. Select your local time zone. Toggle between summer time if required.

D. Click Apply or Saving time zone to the device button.

E. Click yes to restart the device and apply the setting.

If you do not apply & restart your camera, the setting will not save.

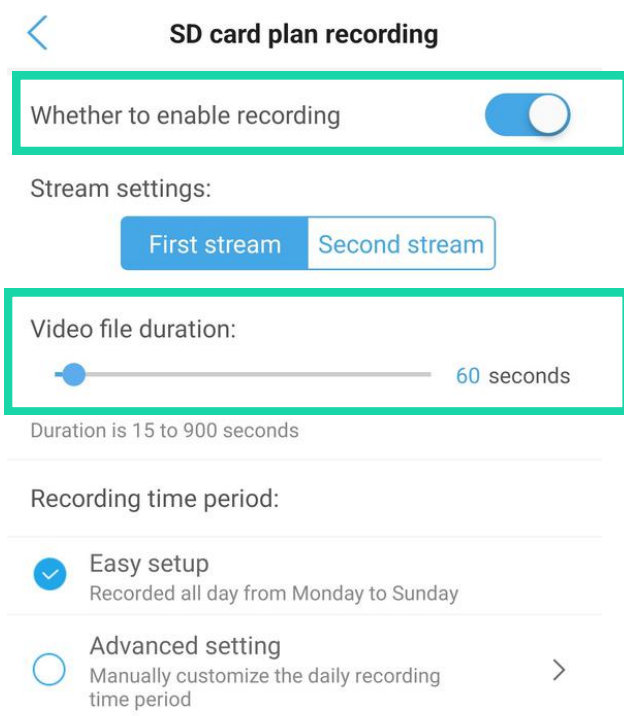

24/7 RECORDING

How to record to your SD card 24/7. These files show as plan recordings in saved file list.

Navigate to settings

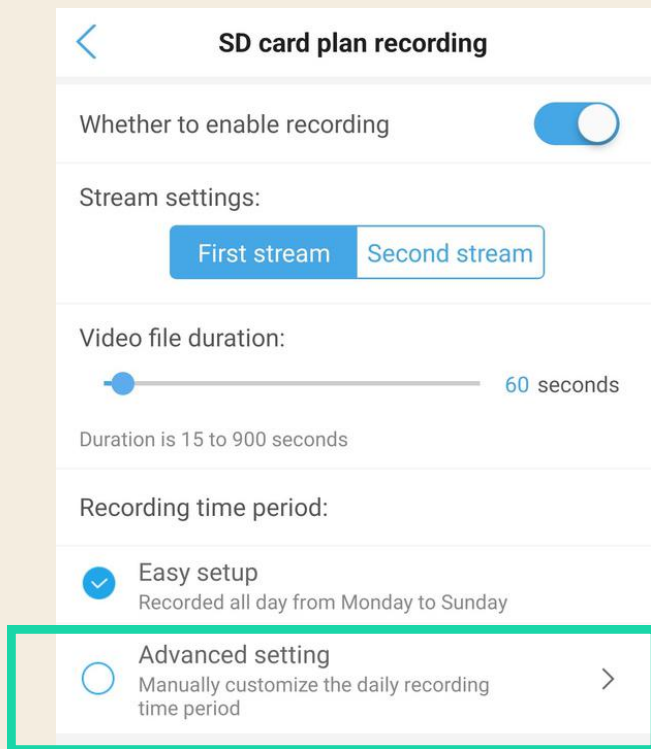

A. Click 'SD card plan recording'

B. You can toggle the 'Whether to enable recording' button to turn on or off 24/7 recording.

C. We recommend setting the video file duration to 60 seconds. This is the how often the video is save to SD card and the length of the clips.

24/7 RECORDING

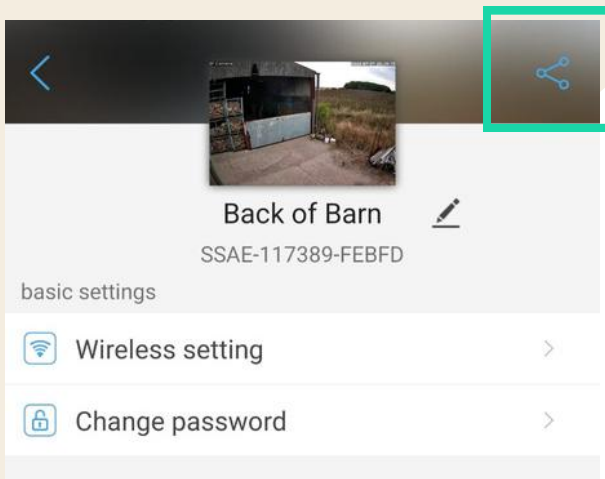

E. You can set the camera to record only between certain hours. Under 'Recording time period' menu select 'Advanced setting'.

SHARING YOUR CAMERA TO ANOTHER DEVICE

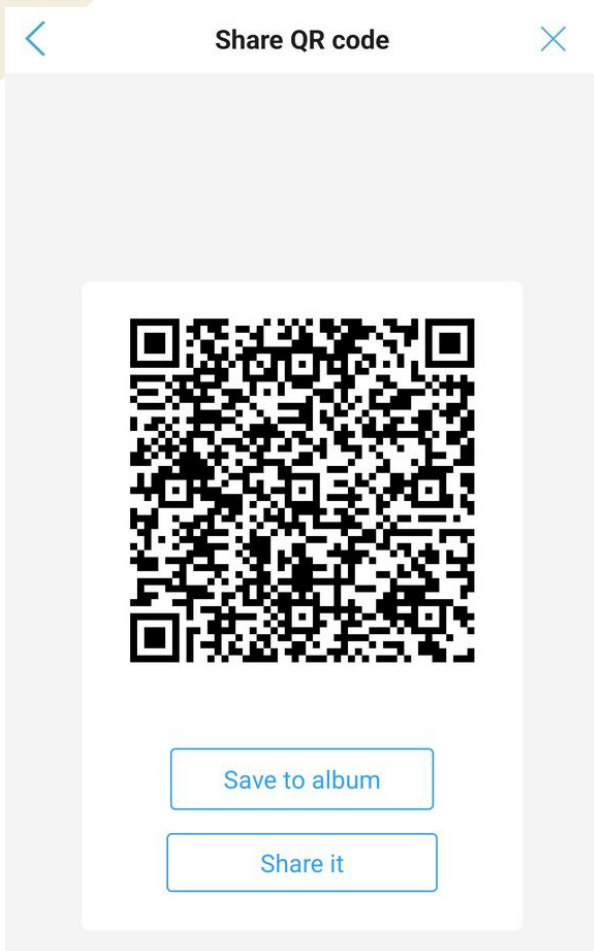

Share your camera to another device without having to enter your username and password manually.

Navigate to settings 

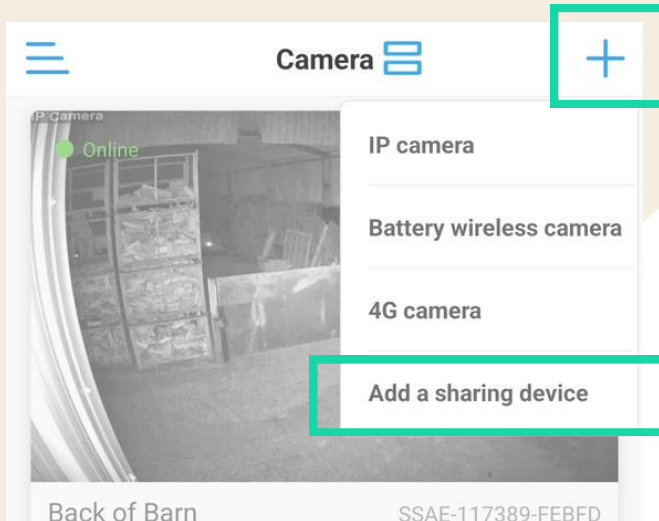

A. Select the share icon in the top right hand corner of the device.

This will show the sharing QR code.

SHARING YOUR CAMERA TO ANOTHER DEVICE

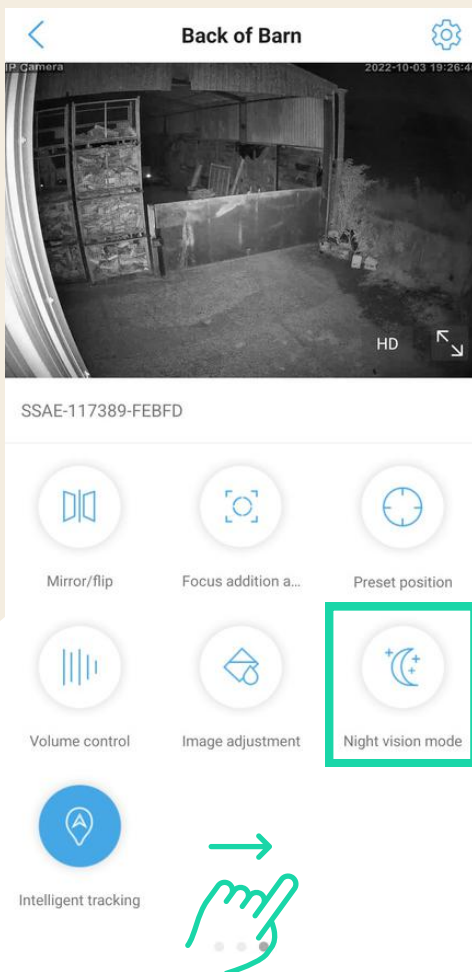

B. Open CamHipro app on the device you wish to add the device to.

C. Click on the + in the top right corner and select 'Add sharing device'. You will now be able to scan the scaring QR code.

NIGHT VISION SETTING

There are different settings for night vision mode. There is a menu where you can change the settings.

A. Click on your chosen camera on the apps home screen.

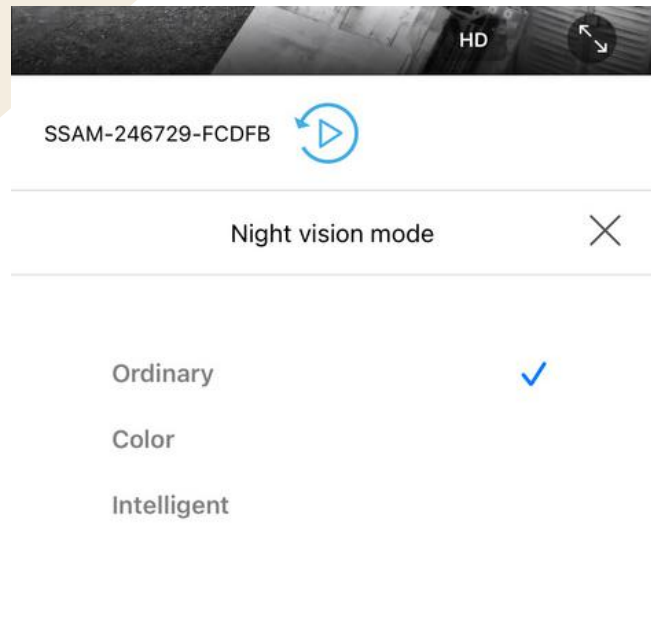

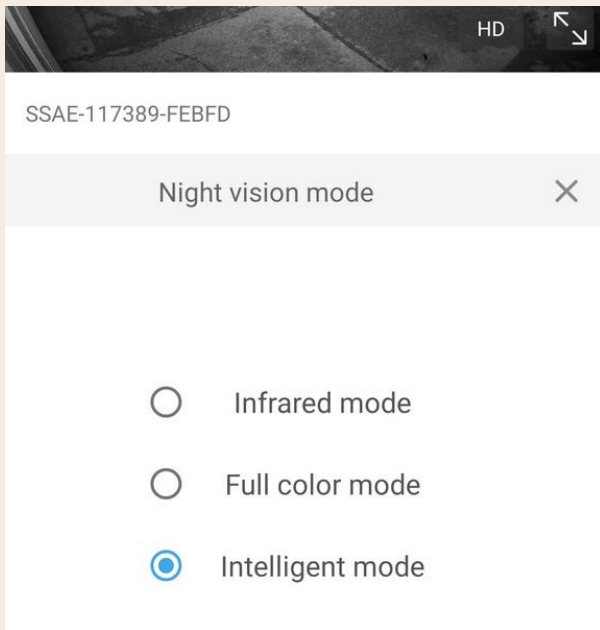

B. Swipe twice to get to the shown menu.

C. Press 'Night Vision Mode'.

NIGHT VISION SETTING

D. Choose your night vision method. (Different phones will show different menus)

Full colour mode or Color

Uses bright LEDs to illuminate the area giving you a colour image.

Infrared mode or Ordinary

Will give you a black and white night vision using infrared LED.

Intelligent mode or Intelligent

Will use infrared until the alarm is triggered to turn on white LED lights.
