

Technical Data Sheet

Activator and Stabilizer

Description

Direct-to-plate chemistry for Mitsubishi Silver Master plate materials. Including both polyester and paper base plate materials.

Processing

Activator – Dilute 1:1 with water.

Stabilizer – Dilute 1:3 with water.

Set processor to plate manufacturers recommendations.

Benefits

Highest level of quality and consistent plate processing.

Superior resolution and sharper images.

Available in quarts and gallons. Quarts eliminate hazardous shipping on the Activator due to the reduced size and packing group.

For optimum roll up on press use with MP Silver Fountain Solution
