LM

feel the
difference

Making dental care safe, efficient and pleasant.

LM

feel the
difference

Your skills are worth LM™

Whether it comes to the design or the production of the LM-Dental™ instruments, we focus on the specific needs of the dental experts. We are in a constant communication with the end users of our products to keep our product development on the cutting edge. We are the innovation leader that others copy. Our radical product theses of the 1980s – a thicker handle, optimized shape, elastic surface, lightness and color coding – have become industry wide standards in the 21st century.

The ergonomics has been the guiding light of our product development since the establishment of the company. Based on new research we now know more than ever about ergonomic instrumentation. The result is LM-ErgoSense®, a future icon in dentistry. With contemporary coating technology we are able to add on additional features, that offer unique benefits for you and your patient. Sharpen free periodontal and non-stick restorative instruments are available for you to choose.

In addition to the new level of ergonomics, LM-ErgoSense® offers new opportunities with its built-in RFID technology, which together with scanning readers and software create a unique LM Dental Tracking System™.

You can feel the difference and so does your most satisfied patient.

PLANMECA

LM-Dental™ is part of the Planmeca Group, one of the world's leading manufacturers of dental equipment.

The pioneer in INSTRUMENT ERGONOMICS

How to define the ergonomics of a hand instrument? Firstly a non-slip, natural grip on an instrument are essential. Secondly a lightweight and optimized design prevents effectively occupational diseases. Thirdly a good tactile sensitivity and easy handling of the instrument guarantee the best clinical results. Reliability, wear resistance and comfort are the features that will be evident for both, the dentist and the patient. These are the guiding principals how Pekka Kangasniemi, DDS, one of the founders of LM™, defined instrument ergonomics already in the 1980s.

Still today our aim in product development is to innovate together with the clinicians. Based on new research we now know more than ever about ergonomic instrumentation. The result is LM-ErgoSense®, which fits the hand perfectly, enables relaxed grip and offers ultimate tactile sensitivity.

Contemporary coatings offer new benefits

With contemporary coating technology we are able to add additional features to our dental instruments offering unique benefits. Sharpen free periodontal and non-stick restorative instruments are finally reality. LM Dark Diamond™ instruments with non-stick diamond like coating allow for pleasant and precise contouring of composite resins.

Sharpen or not?

In periodontics the hot discussion topic has been whether instruments should be sharpened or not. In both cases LM™ periodontal instruments are ultimate in metallurgy. The high wear resistance and hardness of the blade metal makes them efficient, long-lasting and comfortable. Resulting from the advanced material technical research and modern micro coating technology LM™ can offer the highest quality in both uncoated and coated product categories.

Sharpen free - The micro coated LM Sharp Diamond™ instruments are completely sharpen free and razor sharp.

Resharpen - If you wish to resharpen the uncoated LM-DuraGradeMAX™ supersteel offers you the ultimate wear resistance.

The choice is yours.

Elastic, ergonomic surface material and optimal contouring
- comfortable and non-slip grip

Special alloyed metal core
- lightweight structure
- metal-to-metal connection for enhanced tactile sensitivity

Optimal rigidity
- excellent sensitivity and efficiency
- outstanding corrosion resistance

Precision formed tips and high-quality finishing
- extremely sharp and smooth cutting edge

UNCOATED

LMDuraGradeMAX™
supersteel

- High wear resistance
- Immune to corrosion
- Can be resharpened

COATED

LMDarkDiamond™
non-stick coating

- Exclusive diamond like coating for restorative instruments
- Extremely hard & smooth surface
 - Easy non-stick application and modeling of composite
- Dark color for maximum contrast

NON-STICK

High-tech production technology

Like every true professional we also aim for the ultimate perfection in our work. LM-Dental™ devotes its entire product development and production process to achieve the best possible quality in all our products for you to have the very best tools to work with. We deliver the highest of quality to guarantee your success in the treatment results. All our products are produced in Finland.

Enjoy sharpen free prophy & perio

Opposites attract. This holds true with high-quality, periodontal instruments. Optimally they are razor sharp, extremely hard, yet smooth and light. A new micro membrane coating made using modern Physical Vapor Deposition (PVD) technology enables LM™ to create LM Sharp Diamond™ instruments with the optimum combination of these features. LM Sharp Diamonds™ are completely sharpen free, tough but refined, offering unique benefits for you and your patient.

"It's great that I don't need to waste my time on sharpening any longer! Since the LM Sharp Diamond™ instruments are totally sharpen free, I can concentrate on the clinical work. Even my patients have noticed how these instruments feel more comfortable and are quieter. I can remove calculus with controlled strokes using extremely light grip. The long-lasting sharpness really makes a difference!"

Anna, Registered Dental Hygienist, USA

CHOOSE SHARP.

SHARPEN FREE MICRO COATING

You will enjoy full control and improved tactile sense while easily effectively removing the calculus.

Savings of time & money

Long-lasting superior sharpness

Highest rated ergonomics with sensational grip*

Improved productivity & clinical results

DIAMOND-LIKE FEATURES

HARDNESS

Hardness contributes to the durability of the instrument. LM Sharp Diamond™ reach hardness of over 63 on Rockwell scale.

WEAR RESISTANCE**

decrease in wear compared to typical dental hand instrument material.

SHARPEN FREE

COATED

LMSharpDiamond™
sharpen free coating

- Micro membrane coating for periodontal instruments made using the most advanced PVD (Physical Vapor Deposition) technology
- Completely sharpen free
- Superior long-lasting sharpness
- Maximal wear resistance

Cutting edge of the LM Sharp Diamond™ curette and the magnification of the edge after the test.

Cutting edge of a typical non-coated curette and the magnification of the edge after the test.

LM-ErgoSense® instrument handle

UNIQUE COMBINATION OF SENSATIONAL ERGONOMICS AND NEW RFID TECHNOLOGY

Today the focus is on ergonomics – without losing sight of efficiency. The LM-ErgoSense® hand instrument meets both of these requirements and is truly a unique combination of ergonomic design and integrated new RFID technology. It is the outcome of intense research and product development in close cooperation with dental clinicians and professionals. An ergonomic, high quality hand instrument naturally feels good in the hand. Even genuinely sensational as the smart LM-ErgoSense® has been described.

Rated as the best hand instrument

The value of a truly ergonomic instrument grip can never be emphasized enough as revealed in several scientific studies. A hand instrument with thick silicone handle has been found to be more usable, cause lower perceived strain and to be more productive than those with thinner handles (1). LM-ErgoSense® was rated as the best in ten out of fourteen specified usability features compared with the other tested instruments in a dental scaling simulation (1). It was also ranked as the best instrument.

Most participants in the authentic scaling part of the study considered the LM-ErgoSense® silicone handle as their favorite due to the enhanced grip, comfort and instrument's functional design. The participants' evaluations were based on their active use of the LM-ErgoSense® in authentic clinical work. In another study focusing on ergonomics, usability characteristics and work productivity using different manufacturers' hand instruments the thick, silicone coated LM hand instruments were the most preferred choice in regard to all 18 usability criteria used in the test (2).

“Feels great
in the hand.”

INTELLIGENCE INSIDE

In designing LM-ErgoSense® instrument LM™ developed an intelligent instrument offering unique opportunities to improve material handling and patient safety in the clinic as a part of LM Dental Tracking System™. All the LM™ instruments with LM-ErgoSense® handle are available with integrated RFID chip enabling a complete and reliable traceability by LM DTST™.

WARRANTY TERMS

Scan the QR for LM-Dental™ warranty terms, or contact your LM™ representative.

Choosing the handle

Choosing the most ergonomic hand instrument can make a big difference in terms of discomforts and disorders when performing dental work. It is by no means insignificant what the diameter of the hand instrument's handle is or what the material of the grip surface is. When holding the instruments for approximately 2,000 hours each year, the design, weight and feel of the instrument are crucial for the dental practitioner in terms of his/her performance and productivity.

LM™ instruments are available with a selection of different handles. All exceptionally ergonomic due to the elastic silicone coating and optimized contouring. The clinician's hand fit and indication both play a role in selecting an ideal handle type. Interchanging different handles, may place the user's hand under even less strain.

Colors, naming and coding

To facilitate color coding and brighten up working practices all the LM™ instruments come in refreshing colors. The name and the code number on the handle ease the identification of the instrument during clinical procedures and maintenance.

Handle selection

LMErgoSense®

The larger diameter and design provide sensational grip that has been proven to be ergonomic and efficient in scientific clinical testing.

LM-ErgoSense® handle is available with integrated LM DTS™ RFID tag. The compatibility with the LM Dental Tracking System™ offers many opportunities to improve asset management and patient safety.

More information about unique LM Dental Tracking System™ at www.dentaltracking.com.

LMErgoMax™

Classic ergonomic design that others copy. Functions well in all clinical procedures and guarantees excellent tactile sensitivity and relaxed grip.

Codes and diameters

Choosing the instrument with special coated tips

Non-stick restorative instruments

LM Dark Diamond™ instruments with non-stick coating allow easy placing and contouring of composite resins. Dark colored tips provide maximum contrast against the filling and reduce the reflections. LM Dark Diamond™ instruments are available with LM-ErgoSense® handle and also with integrated LM DTS™ RFID tag.

See the codes and features on pages 47-48.

No more sharpening!

Sharpen free LM Sharp Diamond™ instrument tips are made from exceptionally durable special metal alloy, and their wear resistance is enhanced by a protective micro membrane coating made using the most advanced PVD (Physical Vapor Deposition) technology. LM Sharp Diamond™ instruments with LM-ErgoSense® handle combine optimal characteristics of superior sharpness, tactile sensitivity and comfort.

LM Sharp Diamond™ instruments, like all LM™ hand instruments with LM-ErgoSense® handle, are available with integrated LM DTS™ RFID tag for the compatibility with unique LM Dental Tracking System™.

Choose sharp and work efficiently.

LM-ErgoMix™ implant instruments |
Periodontal hand instrument sets

LMSharpDiamond™ - Enjoy sharpen free prophylaxis and perio

LM Sharp Diamond™ instruments are completely sharpen free. These instruments are made from exceptionally durable special metal alloy, and its wear resistance is enhanced by a protective micro membrane coating.

Sharpness & comfort

LM Sharp Diamond™ instruments with LM-ErgoSense® handle are especially suitable for clinicians who use hand instruments frequently and want to minimize the time spent maintaining dental instruments. These instruments combine optimal characteristics of superior sharpness, tactile sensitivity and comfort.

Better instruments, better outcomes

LM Sharp Diamond™ instruments are well-suited for all forms of scaling. These instruments retain their original functionality, size and shape throughout their lifetime. The time saved from sharpening can be used for productive work and promotion of health. Choose sharp and work efficiently.

“ It's great that I don't need to waste my time on sharpening any longer! Since the LM Sharp Diamond™ instruments are totally sharpen free, I can concentrate on the clinical work. I can remove calculus with controlled strokes using extremely light grip. The long-lasting sharpness really makes a difference!”

SICKLE SCALERS

For the removal of supragingival calculus.

Instrumentation:

For calculus removal place the tip third of the scaler's cutting edge against the tooth. Tilt the instrument toward the tooth to achieve 70° to 80° angle between the tooth and the blade. Apply lateral pressure and activate the scaler by using vertical, diagonal or horizontal pull strokes. To maintain control use short 2-3 mm long strokes.

Design:

- Triangular cross section
- Face perpendicular to the lower shank
- Two cutting edges (red line)
- Pointed tip

Scaler LM Nebraska 128

- Instrument for the anterior interproximals

- LMErgoSense®** LM 128-128 ES
- LMErgoSense®** LM 128-128 EST
- LMErgoMax™** LM 128-128 XSI

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 128-128SD ES
- LMErgoSense®** LM 128-128SD EST

Micro Sickle

- Anterior/posterior scaler
- Delicate working end, elongated shank

- LMErgoSense®** LM 301-302 ES
- LMErgoSense®** LM 301-302 EST
- LMErgoMax™** LM 301-302 XSI
- LMErgoNorm™** LM 301-302 SI

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 301-302SD ES
- LMErgoSense®** LM 301-302SD EST

Delicate working end. Especially for tight interdental spaces.

For all tooth surfaces, especially proximal surfaces.

Mini Sickle

- Fine, slightly angled blade
- For all tooth surfaces

- LMErgoSense®** LM 311-312 ES
- LMErgoSense®** LM 311-312 EST
- LMErgoMax™** LM 311-312 XSI
- LMErgoNorm™** LM 311-312 SI

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 311-312SD ES
- LMErgoSense®** LM 311-312SD EST

LM-SharpJack™

- Anterior/posterior scaler
- Thin dual-edged blades for easy and efficient interproximal access

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 315-316SD ES
- LMErgoSense®** LM 315-316SD EST

Sickle LM23

- Posterior scaler
- Shorter blade and longer lower shank than in the Mini Sickle (LM 311-312)

- LMErgoSense®** LM 313-314 ES
- LM 313-314 EST**
- LMErgoMax™** LM 313-314 XSI
- LMErgoNorm™** LM 313-314 SI

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 313-314SD ES
- LM 313-314SD EST**

Sickle LM204S

- Sharply angulated shank and very fine working end

- LMErgoSense®** LM 303-304 ES
- LM 303-304 EST**
- LMErgoMax™** LM 303-304 XSI

NEW

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 303-304SD ES
- LM 303-304SD EST**

Scaler H6-H7

- For all tooth surfaces
- Longer shank and smaller lateral bending than in LM-SharpJack™ (LM 315-316SD ES)

- LMErgoSense®** LM 146-147 ES
- LM 146-147 EST**
- LMErgoMax™** LM 146-147 XSI
- LMErgoNorm™** LM 146-147 SI

With sharpen free LM Sharp Diamond™ coated tips:

- LMErgoSense®** LM 146-147SD ES
- LM 146-147SD EST**

Push Scaler H4-H5

- The chisel-like working end used by pushing.
- The jacquette working end used by pulling.
- 90° working surface

- LMErgoSense®** LM 144-145 ES
- LM 144-145 EST**
- LMErgoMax™** LM 144-145 XSI
- LMErgoNorm™** LM 144-145 SI

Laplander

- Similar to H6-H7 (LM 146-147) but with a lateral bending
- Easy access to molar area and proximal surfaces

- LMErgoSense®** LM 148-149 ES
- LM 148-149 EST**
- LMErgoMax™** LM 148-149 XSI

Crane-Kaplan

- Extremely strong, rigid, sharply angled blade
- For removal of heavy supragingival calculus

- LMErgoSense®** LM 322-323 ES
- LM 322-323 EST**
- LMErgoMax™** LM 322-323 XSI
- LMErgoNorm™** LM 322-323 SI

Mini Kaplan

- Same angle but with a more delicate blade than in the Crane-Kaplan (LM 322-323)

- LMErgoSense®** LM 333-334 ES
- LM 333-334 EST**
- LMErgoMax™** LM 333-334 XSI
- LMErgoNorm™** LM 333-334 SI

UNIVERSAL CURETTES

Designed for the removal of moderate and heavy calculus from all supra- and subgingival tooth surfaces.

Instrumentation:

For calculus removal place one of the cutting edges of the universal curette against the tooth surface. Tilt the instrument toward the tooth to achieve 70° to 80° angle between the tooth and the blade. Apply lateral pressure and activate the curette by using vertical, diagonal or horizontal pull strokes. Both cutting edges of the same curette can be used by simply tilting the instrument one way or the other.

Design:

- Working end perpendicular to the lower shank
- Two cutting edges (red line)
- Rounded tip

McCALL

Strong blade with rigid shank.

McCall 13S-14S

- For incisors and premolars

- LMErgoSense®** LM 222-223 ES
- LM 222-223 EST**
- LMErgoMax™** LM 222-223 XSI
- LMErgoNorm™** LM 222-223 SI

Mini McCall 13S-14S

- For deep, narrow pockets
- Sharper, slightly rounded tip (not sickle-shaped)

- LMErgoSense®** LM 222-223M ES
- LM 222-223M EST**
- LMErgoMax™** LM 222-223M XSI
- LMErgoNorm™** LM 222-223M SI

Clinical use

Curette LM 15-16

- Alternative for the McCall 13S-14S
- For removal of heavy calculus

- LMErgoSense®** LM 225-226 ES
- LM 225-226 EST**
- LMErgoMax™** LM 225-226 XSI
- LMErgoNorm™** LM 225-226 SI

McCall 17-18

- Especially for broad molar surfaces
- Strong, uniform-width working end

- LMErgoSense®** LM 277-278 ES
- LM 277-278 EST**
- LMErgoMax™** LM 277-278 XSI
- LMErgoNorm™** LM 277-278 SI

McCall 17S-18S

- Excellent in tight interdental spaces
- More delicate blade, working end narrower than in 17-18

- LMErgoSense®** LM 279-280 ES
- LM 279-280 EST**
- LMErgoMax™** LM 279-280 XSI
- LMErgoNorm™** LM 279-280 SI

LANGER **MD** **CE**
0537

Langer curettes combine universal curette's working end with Gracey curette's shank angulation. Angulations ease access to difficult areas and both mesial and distal surfaces can be treated with the same instrument end.

Langer 1/2

- For premolars and molars in the lower jaw

- LMErgoSense®** LM 281-282 ES
- LMErgoSense®** LM 281-282 EST
- LMErgoMax™** LM 281-282 XSI
- LMErgoNorm™** LM 281-282 SI

Langer 3/4

- For premolars and molars in the upper jaw

- LMErgoSense®** LM 283-284 ES
- LMErgoSense®** LM 283-284 EST
- LMErgoMax™** LM 283-284 XSI
- LMErgoNorm™** LM 283-284 SI

Langer 5/6

- For incisors in the upper and lower jaw

- LMErgoSense®** LM 285-286 ES
- LMErgoSense®** LM 285-286 EST
- LMErgoMax™** LM 285-286 XSI
- LMErgoNorm™** LM 285-286 SI

MINI LANGER **MD** **CE**
0537

Mini Langers have longer shanks and shorter working ends than standard Langers. Useful in tight interdental spaces. Better access into tight deep pockets and furcations.

Mini Langer 1/2

- For premolars and molars in the lower jaw

- LMErgoSense®** LM 281-282M ES
- LMErgoSense®** LM 281-282M EST
- LMErgoMax™** LM 281-282M XSI
- LMErgoNorm™** LM 281-282M SI

Mini Langer 3/4

- For premolars and molars in the upper jaw

- LMErgoSense®** LM 283-284M ES

- LMErgoSense®** LM 227-228SD EST

DUAL GRACEYS

LM Dual Gracey™ combines the benefits of a universal curette and a Gracey curette in one. These instruments are designed for the removal of supra and subgingival calculus from all tooth surfaces. Each LM Dual Gracey™ tip has two elliptical cutting edges - a mesial and a distal edge. This design allows for treatment both mesial and distal tooth surfaces. LM Dual Graceys™ are suitable for vertical, horizontal and oblique scaling techniques.

Design:

- Two elliptical cutting edges
- Rounded tip

LM™ INNOVATION

LMSyntette™, the Story of ORIGINAL Dual Gracey

In the late '70s Swedish dentist Leif Ericsson, the head of the Perio Department in Västervik Hospital in Sweden, was challenged by the complexity and number of instruments used during periodontal treatments. *Couldn't there be an easier choice and more versatile instrument?*, he thought.

Ericsson analyzed the design and function of the two most popular Graceys - 11/12 and 13/14 - and came up with the innovative idea: a synthesis of two curettes - a Syntette™!

A meeting on the train with founder of LM™, Finnish dentist Pekka Kangasniemi in '80s, restarted the discussions about the idea for a double-sided Gracey, and a truly universal instrument, the Syntette™ was conceived.

Syntette™

- A combination of universal curette and Gracey 11/12 and Gracey 13/14 curettes
- For removal of supra and subgingival calculus in premolar and molar areas
- For all tooth surfaces

- LMErgoSense®** LM 215-216 ES

|--|----------------|
| | LM 259-260 ES |
| | LM 259-260 EST |
| | LM 259-260 XSI |

Handle options:

HOE SCALERS

For the removal of supra- and subgingival calculus. Suitable for deep, narrow pockets and concave root surfaces. For both vertical and horizontal techniques.

Design:

- Fine hoe-shaped blade with rounded corners
- Elliptical cutting edge

Hoe Scaler, anterior

- For the anterior labial and lingual surfaces
- Works well also with lower incisors that are orally inclined

- **LMErgoSense®** LM 112-113 ES
- **LM 112-113 EST**
- **LMErgoMax™** LM 112-113 XSI
- **LMErgoNorm™** LM 112-113 SI

Hoe Scaler, lateral

- For the buccal and lingual surfaces of all teeth
- Can also be used for furcations

- **LMErgoSense®** LM 134-135 ES
- **LM 134-135 EST**
- **LMErgoMax™** LM 134-135 XSI
- **LMErgoNorm™** LM 134-135 SI

Hoe Scaler, posterior

- For the mesial and distal surfaces of molars
- Can also be used for furcations

- **LMErgoSense®** LM 156-157 ES
- **LM 156-157 EST**
- **LMErgoMax™** LM 156-157 XSI
- **LMErgoNorm™** LM 156-157 SI

SURGICAL HANDLE

LM-ErgoHold™ 3

- Excellent grip with elastic silicone coating
- Precise blade control
- Controlled rotation
- Blade position responsiveness maintained
- Controlled movement through tissue
- Fits all blades with fitment No. 3 (blades 10, 10A, 11, 11K, 11P, 12, 12D, 15, 15C and 15S)

- **LMErgoHold™** LM 9003
- **LM 9003T**

Handle options:

GRACEY CURETTES

Area specific curettes for the removal of deep subgingival calculus. For the finishing of subgingival root surfaces.

Design:

- Working surface inclined 20° to the lower shank
- One curved cutting edge (red line)
- Rounded cutting tip

Instrumentation:

Place the tip third or half of the cutting edge of a Gracey curette against the tooth surface. The larger outer curve is always the cutting edge. Make sure that the lower shank is parallel with the tooth surface. For calculus removal apply moderate and for root planing light lateral pressure and activate the curette by using vertical, diagonal or horizontal pull strokes.

LMErgoNorm™ LM 245-246R SI

The types of Gracey curettes:

MESIAL-DISTAL GRACEY

Combining a mesial and a distal working end in one instrument. Useful when treating one quadrant at a time.

All mesial-distal Graceys have code rings that make it easy to identify which working end is mesial and which distal.

Gracey 11/14

-  LM 211-214 ES
-  LM 211-214 EST
-  LM 211-214 XSI
-  LM 211-214 SI

Gracey 12/13

-  LM 212-213 ES
-  LM 212-213 EST
-  LM 212-213 XSI
-  LM 212-213 SI

Gracey 15/18

-  LM 245-248 ES
-  LM 245-248 EST
-  LM 245-248 XSI
-  LM 245-248 SI

Gracey 16/17

-  LM 246-247 ES
-  LM 246-247 EST
-  LM 246-247 XSI
-  LM 246-247 SI

MINI MESIAL-DISTAL GRACEY

Mini models have longer lower shank and smaller working end than the standard model. Functions well in deep narrow pockets.

Mini Gracey 11/14

-  LM 211-214M ES
-  LM 211-214M EST
-  LM 211-214M XSI
-  LM 211-214M SI

Mini Gracey 12/13

-  LM 212-213M ES
-  LM 212-213M EST
-  LM 212-213M XSI
-  LM 212-213M SI

Mini Gracey 15/18

-  LM 245-248M ES
-  LM 245-248M EST
-  LM 245-248M XSI
-  LM 245-248M SI

EXCHANGEABLE TITANIUM TIPS FOR IMPLANTS

MD CE
0537

LMErgoMix™

A great instrument series for implant maintenance. The LMErgoMix™ structure ensures excellent tactile sensitivity and optimal rigidity.

LMErgoMix™ hand instrument series offers the dental team a specially economical, ecological and ergonomic alternative. Whenever there is a need for a tip replacement the lock grip is opened, a new tip is inserted and the lock grip is closed again. No extra tools are needed.

Use LMErgoMix™ instruments in the normal way, clean and sterilize it like any other instrument. The sealed construction guarantees high level hygiene.

Benefits of retipping:

- Always sharp instruments
- Minimizes waste
- Enables personalized tip combinations.

Titanium tips for sensitive but still effective implant maintenance.

*Exclusively selected
by Dr. Giano Ricci / Style Italiano*

Includes:
Implant Mini Universal curette, Concavity File SV 5-6, Mini Gracey 13-14, Mini Gracey 11-12, Mini Gracey 7-8, McCall 17S-18S, North Carolina Probe, Furcation Probe, LM-Servo™ 8 cassette

“ The LM-PerioKit by Style Italiano contains the essentials for the best possible therapy.

Instruments have been selected in the spirit of Style Italiano whose philosophy is to make treatment feasible, teachable, repeatable. Periodontal therapy too can follow this approach. It's my feeling that, in the best interest of his patients, every practitioner should be able to properly execute non surgical therapy, crown lengthening procedures, free gingival grafts, simpler surgical root coverages.”

Giano Ricci
MD. DDS. MScD.

SPOON EXCAVATORS

For the removal of softened carious dentin and temporary fillings.

Design:

- Spoon-shaped working end
- Rounded tip
- Long cutting edge, which can easily treat broader areas

Handle options:

Spoon Excavator, 1.0 mm

- LMergoSense® LM 522-523 ES
- LMergoSense® LM 522-523 EST
- LMergoMax™ LM 522-523 XSI
- LMergoNorm™ LM 522-523 SI

Spoon Excavator, 1.5 mm

- LMergoSense® LM 533-534 ES
- LMergoSense® LM 533-534 EST
- LMergoMax™ LM 533-534 XSI
- LMergoNorm™ LM 533-534 SI

ROUND EXCAVATORS

Cariology:

- For the removal of softened, carious dentin
- For the removal of temporary fillings

Surgery:

- To sever the periodontal ligament prior to extraction
- For the removal of granulation tissue after extraction

Design:

- Round working end
- Curved cutting edge

Round Excavator, 1.0 mm

- LMergoSense® LM 61-62 ES
- LMergoSense® LM 61-62 EST
- LMergoMax™ LM 61-62 XSI
- LMergoNorm™ LM 61-62 SI

Round Excavator, 1.5 mm

- LMergoSense® LM 63-64 ES
- LMergoSense® LM 63-64 EST
- LMergoMax™ LM 63-64 XSI
- LMergoNorm™ LM 63-64 SI

Round Excavator, 2.0 mm

- LMergoSense® LM 65-66 ES
- LMergoSense® LM 65-66 EST
- LMergoMax™ LM 65-66 XSI
- LMergoNorm™ LM 65-66 SI

TRIPLE-ANGLED BACK ACTION EXCAVATORS

Cariology:

- For removing carious dentin
- For undermining enamel during tissue-saving preparations
- For the horizontal finishing of outer cavity margins

Periodontics:

- For the removal of calculus from hard to reach areas such as the lower anterior lingual surfaces
- For the depuration of concave root grooves and furcations

Surgery:

- For the removal of granulation tissue in connection with apical resections, flap operations, or extractions

Design:

- Round working end and curved cutting edge
- Shank angulations ease treatments on hard to reach buccal, distal, and lingual surfaces

The blade shank is triple-angled, allowing for "back action" functions

Triple-angled Back Action Excavator, 1.0 mm

- LMErgoSense®** LM 611-621 ES
- LM 611-621 EST**
- LMErgoMax™** LM 611-621 XSI
- LMErgoNorm™** LM 611-621 SI

Triple-angled Back Action Excavator, 1.5 mm

- LMErgoSense®** LM 631-641 ES
- LM 631-641 EST**
- LMErgoMax™** LM 631-641 XSI
- LMErgoNorm™** LM 631-641 SI

Triple-angled Back Action Excavator, 2.0 mm

- LMErgoSense®** LM 651-661 ES
- LM 651-661 EST**
- LMErgoMax™** LM 651-661 XSI
- LMErgoNorm™** LM 651-661 SI

Triple-angled Back Action Excavator, 3.5 mm

- LMErgoSense®** LM 671-681 ES
- LM 671-681 EST**
- LMErgoMax™** LM 671-681 XSI
- LMErgoNorm™** LM 671-681 SI

- For the horizontal finishing of outer cavity margins

GINGIVAL MARGIN TRIMMERS

For finishing enamel margins in the proximal area as well as for making plastic, amalgam and ceramic fillings.

Gingival Margin Trimmer, 1.2 mm, distal

- LMErgoSense®** LM 121-122 ES
- LM 121-122 EST**
- LMErgoMax™** LM 121-122 XSI
- LMErgoNorm™** LM 121-122 SI

Gingival Margin Trimmer, 1.2 mm, mesial

- LMErgoSense®** LM 125-126 ES
- LM 125-126 EST**
- LMErgoMax™** LM 125-126 XSI
- LMErgoNorm™** LM 125-126 SI

SPATULA

Spatula

- LMErgoSense®** LM 450-460 ES
- LM 450-460 EST**
- LMErgoMax™** LM 450-460 XSI
- LMErgoNorm™** LM 450-460 SI

CORD PACKERS

For packing retraction cord into the gingival pocket.

The bent blade enables getting around the tooth as well as the packing of the cord using vertical motions.

Cord Packer, 2.0 mm

- LMErgoSense®** LM 490-491 ES
- LM 490-491 EST**
- LMErgoMax™** LM 490-491 XSI
- LMErgoNorm™** LM 490-491 SI

Cord Packer, 2.6 mm

- LMErgoSense®** LM 492-493 ES
- LM 492-493 EST**
- LMErgoMax™** LM 492-493 XSI
- LMErgoNorm™** LM 492-493 SI

BASE CARRIERS

For carrying base or thin liner to dentin surfaces.

Base Carrier, rigid

- LMErgoSense®** LM 29H-30H ES
- ☞** LM 29H-30H EST
- LMErgoMax™** LM 29H-30H XSI

Base Carrier - Condenser, malleable tip

- LMErgoSense®** LM 30-34 ES
- ☞** LM 30-34 EST
- LMErgoMax™** LM 30-34 XSI
- LMErgoNorm™** LM 30-34 SI

- Tip (30) can be bent into the desired form, allowing for easier access to hard to reach areas

Base Carrier - Condenser, rigid

- LMErgoSense®** LM 30H-34 ES
- ☞** LM 30H-34 EST
- LMErgoMax™** LM 30H-34 XSI
- LMErgoNorm™** LM 30H-34 SI

PLUGGERS

For packing all types of filling materials.

Plugger, cylindrical, 1.0-1.5 mm

- LMErgoSense®** LM 340-360 ES
- ☞** LM 340-360 EST
- LMErgoMax™** LM 340-360 XSI
- LMErgoNorm™** LM 340-360 SI

Plugger, cylindrical, 1.2-2.0 mm

- LMErgoSense®** LM 350-380 ES
- ☞** LM 350-380 EST
- LMErgoMax™** LM 350-380 XSI
- LMErgoNorm™** LM 350-380 SI

Plugger, cylindrical, 1.8-2.5 mm

- LMErgoSense®** LM 370-390 ES
- ☞** LM 370-390 EST
- LMErgoMax™** LM 370-390 XSI
- LMErgoNorm™** LM 370-390 SI

BURNISHERS

For burnishing, modelling and finishing of fillings.

Burnisher

- LMErgoSense®** LM 31-32 ES
- ☞** LM 31-32 EST
- LMErgoMax™** LM 31-32 XSI
- LMErgoNorm™** LM 31-32 SI

- For burnishing fillings at cavity margins
- For packing and shaping of composite fillings
- For packing of inlay/onlay fillings

Burnisher - Plugger, ball-ended, 1.5-2.5 mm

- LMErgoSense®** LM 471-473 ES
- ☞** LM 471-473 EST
- LMErgoMax™** LM 471-473 XSI
- LMErgoNorm™** LM 471-473 SI

- For plugging filling into cavity
- For polishing
- For plugging and shaping of composite fillings

Burnisher 27-29

- LMErgoSense®** LM 476-477 ES
- ☞** LM 476-477 EST
- LMErgoMax™** LM 476-477 XSI
- LMErgoNorm™** LM 476-477 SI

- For shaping of occlusal surfaces
- For burnishing of fillings at cavity margins

Burnisher 21

- LMErgoSense®** LM 372-373 ES
- ☞** LM 372-373 EST
- LMErgoMax™** LM 372-373 XSI
- LMErgoNorm™** LM 372-373 SI

- For shaping and packing of composite fillings
- For shaping of occlusal surfaces before hardening
- Pits, grooves, lateral ridges

INSTRUMENTS FOR AESTHETIC RESTORATIONS

MD CE

STYLEITALIANO
SHADE GUIDES

LM-Arte™ is a set of innovative instruments for aesthetic restorations and designed especially for composite layering. Each instrument is color-coded and named by its main function to enable easy, efficient and quick restorative treatments.

LM-Arte™ instruments have been developed in co-operation with Style Italiano, a study group of passionate clinicians and researchers specialized in aesthetic restorative dentistry.

Founders of Style Italiano, Walter Devoto DDS and Angelo Putignano MD, DDS.

LM-Arte™ Applica Twist

- LMErgoSense®** LM 464-494 ES
- LMErgoSense®** LM 464-494 EST
- LMErgoMax™** LM 464-494 XSI

- Thin and narrow spatula with bended angles for modeling difficult to reach areas such as approximal walls or the marginal ridge in matrix

LM-Arte™ Modella

- LMErgoSense®** LM 442-443 ES
- LMErgoSense®** LM 442-443 EST
- LMErgoMax™** LM 442-443 XSI

- A very thin and flexible spatula for transporting and modeling of the composite

LM-Arte™ Condensa

- LMErgoSense®** LM 488-489 ES
- LMErgoSense®** LM 488-489 EST
- LMErgoMax™** LM 488-489 XSI

- A long and round plugger especially for modeling composite

LM-Arte™ Fissura

- LMErgoSense®** LM 481-487 ES
- LMErgoSense®** LM 481-487 EST
- LMErgoMax™** LM 481-487 XSI

- Sharp pointed tips for modeling of occlusal surface structures

LM-Arte™ Misura

- LMErgoSense®** LM 496-497 ES
- LM 496-497 EST**
- LMErgoMax™** LM 496-497 XSI

- For horizontal and vertical measuring of thickness of composite layers on the restorations

LM-Arte™ Posterior Misura

- LMErgoSense®** LM 498-499 ES
- LM 498-499 ES**
- LMErgoMax™** LM 498-499 XSI

- For horizontal and vertical measuring of thickness of composite layers on the posterior restorations
- The fork shaped tip allows measuring and modeling of the composite wall with the presence of a matrix

LM-Arte™ Cusp Misura

- LMErgoSense®** LM 468-469 ES
- LM 468-469 EST**
- LMErgoMax™** LM 468-469 XSI

- Unique instrument for estimating cusp thickness and height for evaluating the need for cusp preparation when performing adhesive restorations.

LM-Arte™ Eccesso

- LMErgoSense®** LM 307-308 ES
- LM 307-308 EST**
- LMErgoMax™** LM 307-308 XSI

- For the removal of composite and bonding residue

LM-ARTE™ SOLO

NEW

LM-Arte™ Solo instruments are ideal for simplifying your daily cases: with just two instruments, you can perform most of your high-end anterior and posterior restorations.

Read more at www.lm-dental.com/LM-Arte

LM-Arte™ Solo Anterior

- LMErgoSense®** LM 431-433 ES
- LM 431-433 EST**
- LMErgoMax™** LM 431-433 XSI

- For high-end esthetic anterior restorations
- Rounded and straight spatulas are designed for modeling anterior teeth, especially labial surfaces

LM-Arte™ Solo Posterior

- LMErgoSense®** LM 434-438 ES
- LM 434-438 EST**
- LMErgoMax™** LM 434-438 XSI

- For high-end posterior composite restorations
- The plugger end is designed for bulk filling and composite material modeling
- The sharp end enables contouring of the occlusal surface anatomy

LMArte™

LM-ARTE™ INSTRUMENT SETS

LM-Arte™ Set

- LMErgoSense®** LM 6840 ES
- LMErgoMax™** LM 6840 XSI

Includes:
LM-Arte™ Eccesso, LM-Arte™ Misura,
LM-Arte™ Fissura, LM-Arte™ Applica,
LM-Arte™ Condensa, LM-Servo™ 5
cassette

LM-Arte™ Posterior Set

- LMErgoSense®** LM 6844 ES
- LMErgoMax™** LM 6844 XSI

Includes:
LM-Arte™ Posterior Misura, LM-Arte™ Cusp
Misura, LM-Arte™ Fissura, LM-Arte™ Modella,
LM-Arte™ Condensa, LM-Servo™ 5 cassette

LM-Arte™ Complete Set

- LMErgoSense®** LM 6848 ES
- LMErgoMax™** LM 6848 XSI

Includes:
LM-Arte™ Eccesso, LM-Arte™ Misura, LM-Arte™ Applica,
LM-Arte™ Posterior Misura, LM-Arte™ Cusp Misura, LM-
Arte™ Fissura, LM-Arte™ Modella, LM-Arte™ Condensa,
LM-Servo™ 8 cassette

LM-GENGIVA™

LM-Gengiva™ gingival retracting kit

LMErgoSense® LM 7556K ES

LMErgoMax™ LM 7556K XSI

Includes:

- LM-Gengiva™ / LM-MultiHolder™ PK III hand instrument (see more on page 46)
- LM-Gingival Retractors (blue) for establishing optimum working conditions for procedures at the gum line. Assortment package of three sizes include circa 90 pieces, 30 pcs/size: S for incisors, M for premolars and XL for molars
- LM-MultiLever™ for the removal of disposable gingival retractors

LM-MULTIHOLDER™ SYSTEM

LM-MultiHolder™ PK I

- LMErgoSense® LM 750-756 ES

- Part of the LM-Gengiva™ gingival retracting kit, see page 45

LM-MultiHolder™ instruments and different kinds of replaceable plastic working ends – a real multi-function instrument!

Angle options allow for easy access to even the more complex areas. Optimal combination of steel and plastic: the steel shank is rigid and only the working end will flex, when required

LM-MultiHolder™ IntroKit

IntroKit contains LM-MultiHolder™ instruments PK I and PK II (XSI or ES), LM-MultiLever™ and samples of all available working ends.

There are a total of 44 working ends, 4 for each size of each working end.

- LM 7555K ES
- LM 7555K XSI

You may order LM-MultiHolder™ IntroKit sample package also separately: LM 7555

LM-Contact Formers

Transparent tip for making correctly formed and tight approximal contact.

- Suitable for use with all matrices
- Will not stick to composite fillings
- Disposable

Four sizes corresponding to the size of the cavity, circa 60 pcs / package

| | |
|---------|---|
| LM 7622 | XS |
| LM 7624 | S |
| LM 7626 | M |
| LM 7628 | L |
| LM 7620 | Assortment package ca 120 pcs (30 pcs / size) |

LM-Gingival Retractors (blue)

For establishing optimum working conditions for procedures at the gum line.

- Disposable

Three sizes, circa 60 pcs / package

| | |
|---------|---|
| LM 7502 | S for incisors |
| LM 7504 | M for premolars |
| LM 7506 | XL for molars |

LM DARK DIAMOND™ NON-STICK COATED INSTRUMENTS

LM Dark Diamond™ instruments with non-stick coating for easy placing and contouring of composite resins. The diamond like coating reduces the stickiness and allows pleasant and precise restorative instrumentation.

LM Dark Diamond™ features:

- Exclusive diamond like coating
- Hard surface
- Smooth surface
- Dark color coating
- LM-ErgoSense® handle

Benefits:

- Non-stick placement and sculpting of the composite resin
- Not sensitive to scratches
- Easy to clean
- Maximum contrast against the filling & minimal reflections
- Extreme precision and feel

LM Dark Diamond™ instruments can be cleaned and sterilized similarly to all other LM™ instruments.

LM Dark Diamond™ coating makes the surface of the tip extremely smooth and hard and allows for non-stick application and modeling of composite.

- LMErgoNorm™** LM 764-766 SI
- For the removal of temporary fillings and crowns
- For bridge removal during fitting

CROWN OFF

A groove is first burred from the lower edge of the crown up to the occlusal surface. The groove should be so deep that it reaches the cement. The Crown Off working end is placed longitudinally into the groove and turned as if spreading the groove. The blade is turned until the crown loosens and lifts up. The blade stays firmly in the groove and it is easy to control even when lot of force is used.

Crown Off

- LMErgoMax™** LM 6657 XSI

Includes:
LM-Servo™ 5 cassette, Mini Spatula, Plastic instrument, ant., Form Condenser, Packer-Modeller IO, Mini Excess Scaler

LM-ENDOMAX™

LM™'s endodontic hand files with large handles are supreme in ergonomics.

Soft and thick silicone handle improves the grip and makes filing and rotating more comfortable. LM-EndoMax™ files and reamers adhere to the contour of the canal, cleaning all surfaces evenly and effectively.

- Improved tactile sensitivity
- Greater working comfort
- Improved torque and force transmission
- Visible identification labels
- Color coding according to ISO specifications

LM-EndoMax™ Reamers

LM™'s reamers have loosely twisted and flexible triangular cross-section instrument blades. The instrument is primarily designed for the apical preparation of straight canals, which is why the blade can also be used for cutting. For this instrument, a rotating preparation motion is the most effective.

LM-EndoMax™ K-files

LM™'s K-Files have an extremely flexible triangular profile blade. The larger cutting angle enhances instrument use compared to a similar square profile instrument. Preparation waste can also be removed from the canal more easily, because there is more room in the instrument threads. The threads are tightly spaced and the tip is sharp, making the instrument ideally suited to the preparation of straight canals using filing and rotating motions. Small sizes (006 - 015) can also be used in preparation of curved canals. A short, back-and-forth preparation motion is most effective for the instrument.

LM-EndoMax™ Hedstroems

The blade on LM™s Hedstroem files is milled instead of twisted like on other root canal instruments. Especially well suited to procedures where space is made for the root canal orifice (coronal flare). Hedstroem files are only intended for use with filing, back-and-forth preparation motions.

LM-EndoMax™ NiTi Files

The material used for NiTi files differs from that used for K-files, where as the file form is the same on both. NiTi (Nickel-Titanium) is an elastic material, which will return to its original shape after bending or deformation. The instrument tip is not used for cutting, which makes LM™s NiTi instruments ideal for the preparation of curved canals. Both a filing and rotating preparation motion are suitable for these instruments.

- LM 27-28 EST
- LM 27-28 XSI
- LM 27-28 SI

ROOT CANAL EXCAVATORS

Root canal excavators have longer lower shanks and sharper blade angles than round excavators.

- Extended and correctly angled shanks as well as highly effective blade angles allow for the preparation of all types of pulp cavities
- Effective for the cleaning of pulp chambers and location of root canals as well as the removal of temporary fillings

 - hygienic

Best Product 2014, Dental Product Shopper

LM-LIFTOUT™

Luxating instruments for atraumatic extraction.

LM-LiftOut™ instruments allow tooth extraction to be done as atraumatically as possible. This is important in order to enable rapid healing and future implant placement. The thin tip of the instrument is introduced into the periodontal space and slowly advanced toward the apex of the root while twisting the instrument gently back and forth. LM-LiftOut™ is not suitable for use as an elevator.

LM-SLIMLIFT™

Luxating instruments designed for extremely narrow places.

LM-SlimLift™ instruments are especially designed to reach places you cannot go with traditional luxating instruments. It allows tooth extraction to be done as atraumatically as possible. This is important in order to enable rapid healing. The extremely fine tip of the instrument is introduced into the very narrow periodontal space. The instrument is slowly advanced towards the apex of the root while turning the instrument gently back and forth. The LM-SlimLift™ is not suitable for use as an elevator.

MAINTENANCE

Cassette
 LM 810001

LM™ extraction instruments are supplied in a convenient cassette that protects both the instrument and the handler during the maintenance cycle. The cassette keeps the instrument from puncturing the sterilization pouch, so sterility is more likely to be assured.

- The cassette can be color-coded
- The cassette is compatible with LM-ServoMax™ tray

Sharpening stone
 LM 818002

Sharpen the extractors occasionally using the round sharpening stone as a simple and quick way to keep them in top condition and always ready to use.

- Suitable for LM-SlimLift™, LM-LiftOut™, LM-TwistOut™ and LM-RootOut™ instruments

LM-TWISTOUT™

Elevators for forceful extraction.

LM-TwistOut™ instruments are suitable for tooth extraction in situations where strong force or torque must be applied.

ROOT TIP INSTRUMENTS

Root Tip Pick

LMErgoSense® LM 769-771 ES

LM 769-771 EST

LMErgoMax™ LM 769-771 XSI

- For the removal of root tip
- Suits well in all difficult to reach areas

LM-RootOut™

LM 812210

LM 812210T

- Designed for delicate root teasing procedures
- Not recommended for more substantial root tip removal
- Similar to Heidbrink root tip picks
- Ergonomically designed handle for a good grip

INSTRUMENTS FOR IMPLANT POSITIONING

Optimal implant insertion

Guiding for correct mesio-distal implant insertion

LM™ Implant Misura MR instruments help positioning the first spiral drill at a correct distance from the pillar i.e. implant or natural element adjacent to the implant and respecting the bone biology.

This results in correct amount of bone between the implant and the tooth, so that the bone crest remains stable over time. Once the biology is respected and the case is spaced correctly, a long lasting esthetic result is established.

Implant adjacement to a natural element

Implant adjacent to another implant in edentulous arch

LM™ Implant Misura MR by **STYLEITALIANO**

The instruments are designed by Marco Redemagni MD, DDS. Style Italiano™ is a study group of passionate clinicians and researchers specialized in aesthetic restorative dentistry.

"These instruments are really essential when it comes to positioning the first drill"

Marco Redemagni MD, DDS

For more details and clinical information about LM™ Implant Misura MR, please scan the QR.

i Markings on the tip facilitate checking bucco-lingual position of the implant drilling.

Choosing the correct size

The instruments are available in different diameters. Each instrument has a larger tip for insertion of adjacent implants and and a smaller tip for spacing an implant from a natural element.

Choose the right instrument size based on the implant diameter:

| Instrument color | Initial drill Ø | | Distance in mm | |
|------------------|------------------|------------------|-----------------|-------------------|
| | 1.5 mm Implant Ø | 2.0 mm Implant Ø | Tooth - Implant | Implant - Implant |
| Gray | 3.4-3.5 | 4.0 | 3.0 | 5.0 |
| Green | 3.75 | 4.25 | 3.1 | 5.3 |
| Yellow | 4.0-4.1-4.15 | 4.6 | 3.3 | 5.6 |
| Orange | 4.3 | 4.8 | 3.4 | 5.8 |
| Blue | 4.8-4.85 | 5.35 | 3.7 | 6.3 |

LM-Activator™ - Early orthodontic intervention

LM-Activator™ is a prefabricated appliance for supporting healthy growth and development of the face and jaw. The ideal time for treatment with LM-Activator™ is in early mixed dentition when the first teeth are changing. By intervening early, the need for further treatment can be significantly reduced and even eliminated. Research indicates that malocclusions in deciduous dentition persist and tend to become more severe as the dentition develops. LM-Activator™ provides soft guidance to teeth and jaws when needed.

How does LM-Activator™ work?

- When the teeth are changing, LM-Activator™ gently guides the teeth and jaw towards a healthy growth.
- LM-Activator™ aligns teeth, activates mandibular growth and expands the arch perimeter in mixed dentition.
- LM-Activator™ corrects and aligns sagittal and vertical relationships simultaneously - no separate phases are needed. The occlusion can be controlled in a 3-dimensional way.
- A large number of different model and size combinations makes it possible to select an LM-Activator™ appliance that is appropriate for the patient.

Scan the QR and watch the video for LM-Activator™ introduction.

Gently guiding the growth of erupting teeth and growing jaws can be compared to trimming and supporting a young plant. Guiding to a healthy growth path early and along the growth is more gentle and the outcome will be more natural.

“The appliance has many advantages. Most importantly, early treatment with LM-Activator™ will stop the development of the malocclusions, thereby preventing the malocclusion to become more severe. For children, LM-Activator™ is easy to use. The treatment is easy and straightforward, and the treatment outcome more natural.”

Professor Emeritus Juha Varrelä, DDS, PhD, Specialist in Orthodontics,
Institute of Dentistry, University of Turku, Finland

GROWING HAPPY SMILES

Advantages for TREATING PATIENTS with LM-Activator™

- ✓ **Corrects efficiently different malocclusions.** Suitable for treating overjet, overbite, deepbite, open bite, crowding, Class II and dental anterior crossbite i.e. inverted incisors. Sagittal and vertical relationships can be corrected simultaneously¹.
- ✓ **Cost-effective.** Single treatment phase with simultaneous alignment, leveling and anteroposterior correction instead of separate stages.
- ✓ **Clinically and scientifically proven.** The treatment method is supported by evidence from cohort controlled and RCT research results.
- ✓ **Reduced treatment complexity.** A large assortment of models makes it possible to select the appropriate appliance for the patient. Treatment can be started immediately.
- ✓ **Models for alternative arch forms.** Narrow model for standard and regular arch widths, and Wide for wider arch forms.
- ✓ **Enhanced durability.** Model with reinforcement in incisal area for improved durability, e.g. for deep bite cases.

Safety and comfort FOR THE PATIENT

- ✓ **Made of medical-grade silicone.** Flexible by nature and comfortable for the patient.
- ✓ **No additives.** No coloring agents, phtalates, softeners, latex, bisphenol-A or fragrance agents.
- ✓ **Safe and fully biocompatible.** The use is safe for the patient. The silicone material is tested in accordance with ISO 10993 requirement of 30 days permanent contact with mucous membranes.
- ✓ **Hygienic.** Daily rinse with water is enough. Can be disinfected by boiling.
- ✓ **Evidence based treatment method.** The treatment method proven by research results, and the appliance has been used by hundreds of thousands of patients around the world.
- ✓ **Removable and used while sleeping.** Patient can eat any food normally, exercise and do any sport, and no metal wire adjustments or emergency visits needed due to broken metal parts.
- ✓ **Feels comfortable.** Anatomically designed and rounded tooth slots.
- ✓ **Gentle on teeth.** Soft silicone is gentle on teeth and comfortable for the patient.
- ✓ **Simple and easy treatment.** No separate treatment phases but simultaneous alignment, leveling and anteroposterior correction reducing treatment complexity.

“Our results showed distinct improvements in overjet, overbite, sagittal molar relationship, and crowding in the treated subjects.”

Myrland R., et al. One year treatment effects of the eruption guidance appliance in 7- to 8-year-old children: a randomized clinical trial. European Journal of Orthodontics, 2015;37(2):128-134. <https://doi.org/10.1093/ejo/cju014>

“An advantage of the eruption guidance appliance is that it not only guides the eruption of the teeth but also simultaneously acts on the transversal, sagittal, and vertical relationships of both dental arches.”

Keski-Nisula K., et al. J. Orthodontic intervention in the early mixed dentition: A prospective, controlled study on the effects of the eruption guidance appliance. AM J of Orthodontics and Dentofacial Orthopedics, 2008;133(2), 254-260. <https://doi.org/10.1016/j.ajodo.2006.05.039>

“As a result of the EGA treatment, the sagittal relationship was corrected from Class II to Class I in 86% of the cases during the active treatment, and it showed further improvement post-treatment. At the age of 16.7 years, 98% of the treatment children, who all had a Class II relationship at the onset of the early mixed dentition, had a Class I relationship.”

Keski-Nisula K., et al. Class II treatment in early mixed dentition with the eruption guidance appliance: effects and long-term stability. European Journal of Orthodontics, 2020;42(2):151-156. <https://doi.org/10.1093/ejo/czj092>

INDICATIONS - when to use LM-Activator™?

LM-Activator™ has proven to be effective in treatment of different malocclusions at different dental stages. Evaluating the dentoalveolar, skeletal and functional characteristics is an essential part of selecting patients for LM-Activator™ treatment. A thorough case-by-case analysis of the patient's malocclusion and its severity as well as of the patients motivation is needed.

The ideal time for treatment with LM-Activator™ is in early mixed dentition when the first teeth are changing. Use of LM-Activator™ is recommended to align teeth, activate mandibular growth and expand the arch perimeter. The chart below provides a demonstrative guideline for case selection.

| | | Deciduous dentition | Early mixed dentition | Late mixed dentition | Early permanent dentition |
|--|----------|---------------------|-----------------------|----------------------|---------------------------|
| Excess overjet, excess overbite, deep bite | Severe | | ■ | ■ | |
| | Moderate | | ■ | ■ | ■ |
| | Mild | | ■ | ■ | ■ |
| Anterior crowding (incisors and canines) | Severe | | ■ | ■ | |
| | Moderate | | ■ | ■ | ■ |
| | Mild | | ■ | ■ | ■ |
| Dentoalveolar anterior crossbite of 1-2 teeth | Severe | | ■ | | |
| | Moderate | | ■ | | |
| | Mild | | ■ | | |
| Rotated anterior teeth | Severe | | ■ | ■ | |
| | Moderate | | ■ | ■ | |
| | Mild | | ■ | | ■ |
| Class II | Severe | | ■ | ■ | |
| | Moderate | | ■ | ■ | |
| | Mild | | ■ | ■ | |
| Scissorsbite / Complete mandibular posterior lingual crossbite (i.e. mandibular posterior teeth completely on the lingual side of the maxillary posterior teeth) | Severe | ■ | | | |
| | Moderate | ■ | | | |
| | Mild | ■ | | | |
| Gummy Smile (Treatment start before the eruption of permanent maxillary central incisors) | Severe | | ■ | | |
| | Moderate | | ■ | | |
| | Mild | | ■ | | |
| Open bite (High model recommended) | Severe | | ■ | ■ | |
| | Moderate | | ■ | ■ | |
| | Mild | | ■ | ■ | |

■ Use of LM-Activator™ recommended

■ Use of LM-Activator™ can be considered

Contraindications:

- Skeletal Class III
- Midline discrepancy > 3mm *)
- Very narrow upper arch *)
- Palatally impacted teeth *)
- Fully erupted anterior teeth that require torquing *)
- Teeth requiring intrusion

*) May be treated with combination treatment (LM-Activator™ together with other appliances such as quad helix)

The treating doctor is solely responsible and liable for diagnosis, treatment, and evaluating whether treatment with LM-Activator™, LM-Trainer™ or any other LM-Dental™'s product is appropriate for a specific patient, and for the outcome of any treatment with LM-Activator™, LM-Trainer™ or any other LM-Dental™'s product. Product used, and use of products shall be determined solely by doctor and evaluated for use with each individual patient where appropriate. Please refer to manufacturer's instructions for use.

LM-Activator™ MODEL ASSORTMENT features

With LM-Activator™ alignment, leveling and anteroposterior correction can be done at the same time without separate phases. A large assortment of models makes it possible to select the appropriate appliance for the patient. Treatment complexity for both the clinician and the patient can be reduced.

The four basic LM-Activator™ model features are: **LOW** and **HIGH**, and **SHORT** and **LONG**. The appliances are combinations of these features. All the models are available also for two arch widths: **NARROW** or **WIDE**. Also **REINFORCED** model with hard insert in the incisal area is available. The choice of model should always be based on an examination and diagnosis done by or under supervision of a specialist in orthodontic treatment. The appliance should always be fitted to the patient to ensure a good fit.

SHORT

Model with a shorter molar section for patients whose second molars have not yet erupted.

LONG

Model with a longer molar section for patients whose second molars have erupted.

LOW

Model with basic appliance thickness is applicable to many different cases.

HIGH

Model with thicker premolar and molar area. Specifically designed for treating skeletal and dentoalveolar open bite cases.

There are two different arch widths of all basic models.

NARROW

Model for narrow and regular dental arch width.

WIDE

Model for wide dental arch width.

All models are available also with incisal reinforcement.

REINFORCED

This model has a rigid reinforcement of harder material in the incisal area and is designed especially for skeletal deep bite cases. The model is also suitable for other patients who benefit from a firm surface and improved durability.

General steps on HOW TO CHOOSE the LM-Activator™ MODEL

The selection chart below provides some general basic guidelines on choosing the right LM-Activator™ appliance for the patient. It is solely the responsibility of the treating doctor to evaluate and determine which model is best suitable for the individual patient.

Scan the QR and watch video guidelines on how to choose the LM-Activator™ model

The treating doctor is solely responsible and liable for diagnosis, treatment, and evaluating whether treatment with LM-Activator™, LM-Trainer™ or any other LM-Dental™'s product is appropriate for a specific patient, and for the outcome of any treatment with LM-Activator™, LM-Trainer™ or any other LM-Dental™'s product. Product used, and use of products shall be determined solely by doctor and evaluated for use with each individual patient where appropriate. Please refer to manufacturer's instructions for use.

Selecting THE SIZE MD CE

LM-OrthoSizer™ is a tool for aiding the selection of the appropriate LM-Activator™ size. The size is indicative and LM-Activator™ should always be fitted to ensure the correct size.

- LM 9400 measures the distance across the upper incisors from the distal surface of the left lateral incisor to the distal surface of the right lateral incisor.
- LM 9402 is to be used like LM 9400 but with LM-Activator™ 2 series. The accuracy is improved with separate measures for mandible and maxilla.
- Both are compatible with LM mirror handles (LM 25 SI/XSI/ES, LM 28 XSI/ES).

LM 9400 LM-OrthoSizer™

LM 9402 LM-Activator™ 2 OrthoSizer™

Checking the fit of the appliance

Fitting the appliance to the patient is the most important step of size selection.

1. No crowding and no risk of crowding
Choose the size that matches the dentition. The canine rests at the bottom of the slot and no distalizing force is placed on the canine. If there is crowding or crowding is expected, consider a larger size to enable expansion of the arch perimeter. In case of diastema consider choosing a smaller size.

2. Crowding or risk of crowding
Select a size that is larger than the dentition. LM-Activator™ guides the canine towards the bottom of its' slot and applies force distally on the canine.

3. The size is too large
The canine is guided against a ridge between two tooth slots and the appliance does not guide the teeth properly. Select a smaller size.

Re-evaluate the size of the appliance when the permanent maxillary and mandibular lateral incisors begin to erupt. It may be necessary to switch to a larger appliance.

LM-Activator™ product range

MD CE

LM-Activator™ has been used by hundreds of thousands of patients around the world for correcting malocclusions and guiding the teeth and jaw to a healthy grow.

LM-Trainer™ products MD CE

LM-Trainer™ can be used in deciduous dentition, e.g. before LM-Activator™ treatment. It can also be used in functional education and for habit correction, e.g. reverse swallowing and mouth breathing, when harmful oral habits risk causing malocclusions.

LM-Trainer™ Medium
LM 94100T

- Slots for incisors and cuspids
- Lip bumper

LM-Trainer™ Small
LM 94100S

- Slots for incisors, lip bumper
- Smaller and softer than LM-Trainer™ Medium

LM-Trainer™ Braces
LM 94100TB

- Used in conjunction with brackets and wires
- Brings the mandible forward for Class II correction
- Prevents irritation and wounding of soft tissue
- Lip bumper

LM-Trainer™ 2 Medium
LM 94100T2

- Bigger than LM-Trainer™ Medium
- High gloss surface
- Slots for incisors and cuspids
- High labial shields and shaped lingual flanges
- Enhanced lip bumper

LM-Activator™ motivational materials

Patient compliance is essential for successful treatment. The first month is crucial in adopting the habit to use the appliance (because creating a habit in general requires 3-4 weeks of regularity).

To motivate the patient and his/her family, age appropriate material is available for both preadolescents and adolescents. It is important to make sure the patient and his/her family understands that irregular use may be equivalent with no treatment at all.

Ask for the available materials from you LM™ representative!

ORTHODONTIC HAND INSTRUMENTS

Mirror Handle, ortho

- Orthodontic mirror handle with Bausch-Verbiest design
- For measuring the sagittal overjet and vertical overbite
- Millimeter scale, total length 25 mm

- LMErgoSense®** LM 25-26 ES
- LMErgoSense®** LM 25-26 EST
- LMErgoMax™** LM 25-26 XSI
- LMErgoSense®** LM 28-26 ES
- LMErgoSense®** LM 28-26 EST
- LMErgoMax™** LM 28-26 XSI

Ligature On-Off SL

- The explorer-like end (17CL) for both application and removal of ligatures. Ligatures can be lined up on the lower shank.
- The forked end (414) is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket.

- LMErgoSense®** LM 414-17CL ES
- LMErgoSense®** LM 414-17CL EST
- LMErgoMax™** LM 414-17CL XSI

Plastic Ligature Applicator

- For placement of orthodontic rubber ligatures

- LMErgoSense®** LM 416-417 ES
- LMErgoSense®** LM 416-417 EST
- LMErgoMax™** LM 416-417 XSI
- LMErgoNorm™** LM 416-417 SI

Arch Wire Tucker

- For bending the end of an arch wire
- The flattened ball-ends have 1 mm holes, where the wire can easily be placed and turned.
- Long blade fits well even in tight places.

- LMErgoSense®** LM 412-413 ES
- LMErgoSense®** LM 412-413 EST
- LMErgoMax™** LM 412-413 XSI

Ligature Tucker - Scaler U15

- For tucking of ligatures and arch wires (414)
- For removing of cement excesses following the removal of orthodontic appliance (150)

- LMErgoSense®** LM 414-150 ES
- LMErgoSense®** LM 414-150 EST
- LMErgoMax™** LM 414-150 XSI

Ligature Director

- For tucking ligatures and arch wires
- For placement of arch wire
- The forked end is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket.
- The forked end tip is rotated 90°

- LMErgoSense®** LM 411-415 ES
- LMErgoSense®** LM 411-415 EST
- LMErgoMax™** LM 411-415 XSI

Ligature Tucker

- For tucking of ligatures and arch wires
- For placement of arch wire
- The forked end is particularly suitable for guiding a ligature ring over e.g. the fourth wing of a bracket.

- LMErgoSense®** LM 414-415 ES
- LMErgoSense®** LM 414-415 EST
- LMErgoMax™** LM 414-415 XSI
- LMErgoNorm™** LM 414-415 SI

IMPROVING MATERIAL FLOWS AND PATIENT SAFETY

Unique RFID intelligence in dental clinics

What if you could know the exact location and status of every dental instrument and material in your clinic?

LM Dental Tracking System™ is the first commercially available system in dental industry to efficiently track and monitor instruments and materials using an advanced RFID technology.

The unique LM Dental Tracking System™ is created by combining scanning readers, proprietary server software and dental instruments and materials with built-in or retrotagged RFID tags. The system gives the visibility of instruments and materials from storage and maintenance to patient care.

The scanned and documented information improves patient safety, material handling and increases cost efficiency. LM DTS™ offers new possibilities within maintenance and clinical use for dental clinics.

KEY ADVANTAGES

Patient safety

- Safe materials
- Sterilized instruments
- Material traceability

Cost reduction

- Avoid time consuming manual controls
- Decrease stock
- Improve material flow

Asset management

- Ease consumption recording
- Indication of demand
- Improve time management

Documentation & education support

- Reduce risks
- Decrease loss
- Clinical training
- Patient session planning

New intelligence in the dental clinic - know the location of all instruments and materials.

LM-SERVO™ E INSTRUMENT CASSETTES

In LM-Servo™ E cassettes the instrument handles are clearly visible providing RFID tag readability and identification of individual instruments, though the tips are securely covered with safety shields preventing sharp injuries and protecting the blades.

The LM-Servo™ E cassette series is available with built-in RFID tagging. This option makes E cassettes excellent tool for improving traceability by enabling easy handling and tracking of instruments as sets. Below you find the product codes for RFID tagged cassettes marked with RFID symbol.

The cassettes can be coded with silicone code buttons (LM 6000 - 6005) and attached to the LM-ServoMax™ with a special lock (LM 6417).

LM-Servo™ 5E

- For five hand instruments
- Cassette is equipped with safety shields of different colors: grey, blue, green and yellow.
- Outer dimensions: 180 x 83 x 26 mm
- Inner dimensions: 174,8 x 78,6 x 21,4 mm

 LM 6551 grey
 LM 6551T grey

 LM 6552 blue
 LM 6552T blue

 LM 6553 green
 LM 6553T green

 LM 6554 yellow
 LM 6554T yellow

LM-Servo™ 8E

- For eight hand instruments
- Cassette is equipped with safety shields of different colors: grey, blue, green and yellow.
- Outer dimensions: 180 x 133 x 26 mm
- Inner dimensions: 174,8 x 128,9 x 21,4 mm

 LM 6581 grey
 LM 6581T grey

 LM 6582 blue
 LM 6582T blue

 LM 6583 green
 LM 6583T green

 LM 6584 yellow
 LM 6584T yellow

LM-SERVOMAX™ TRAY SYSTEM MD CE

LM ServoMax™

Optimal work flow & rational maintenance.

LM-ServoMax™ tray system organises and rationalises the handling of dental instruments and accessories during the procedures and maintenance. It facilitates good infection control and saves time by reducing the handling of individual items. It also prolongs the life span of instruments and protects the personnel. Its versatile modules keep all instruments and accessories organised in a single tray. The system is adaptable to treatment specific and individual needs.

LM-ServoMax™ tray set
LM 6410

- Includes: 1 set of universal trappers and 2 metal clips
- Dimensions: 288 x 185 x 29 mm

Rational maintenance with minimal handling

LM-ServoMax™ universal trapper, 2 pcs
LM 6416

LM-ServoMax™ metal clips, 2 pcs
LM 6415

- For locking LM-Servo™ 5 or LM-Servo™ 8 instrument cassette on the tray

LM-ServoMax™ standard case
LM 6420

LM-ServoMax™ restoration / endo case
LM 6430

LM-ServoMax foam, 20 pcs
LM 6435

- For cleaning the endo files

LM-ServoMax™ ultrasonic tip case
LM 6460

- For six ultrasonic tips

LM-ServoMax™ bur endofile case
LM 6450

- For eight burs and fourteen files
- Includes adjustment and measuring scales for files

LM-ServoMax™ syringe holder
LM 6495

- A stand attachable to the LM-ServoMax™ tray to place the anesthetic syringe safely in the needle guard

- LM-ServoMax™ tray system modules have a universal design that complies the standard for dental tray dimensions. They are made of exceptionally durable special plastic which tolerate all common cleaning and sterilisation methods and agents (max 134 °C / 273 °F). Modules are sold empty.

LM-ServoMax™ waste cup holder
LM 6490

LM-ServoMax™ instrument rack

- LM 6471 black
- LM 6472 orange
- LM 6473 blue
- LM 6474 red
- LM 6475 green

- Color-coded rails for attaching instruments to the LM-ServoMax™ tray
- Length adjustable according to the size of instruments
- Package 2 pcs / color

LM-SERVO™ CASSETTES MD CE

In LM-Servo™ cassettes hand instruments are locked securely but rotate freely for optimal cleaning and guaranteed infection control. The cassettes can be coded with silicone code buttons.

The cassettes can be attached to the LM-ServoMax™ tray with metal clips (LM 6415).

LM-Servo™ 5
LM 6650

- For five hand instruments
- Dimensions: 180 x 86 x 28 mm

LM-Servo™ 8
LM 6680

- For eight hand instruments
- Dimensions: 180 x 136 x 28 mm

CODING PRODUCTS

Code buttons

- LM 6000 blue
- LM 6001 green
- LM 6002 orange
- LM 6003 red
- LM 6004 yellow
- LM 6005 brown

- For color-coding the LM-Servo™ and LM-Servo™ E cassettes
- Package 20 pcs / color

Code rings

- LM 5000 blue
- LM 5001 green
- LM 5002 orange
- LM 5003 red
- LM 5004 yellow
- LM 5005 black
- LM 5006 white
- LM 5007 brown
- LM 5008 lavender
- LM 5009 pink
- LM 5010 dark grey
- LM 5011 lime

- For color-coding hand instruments
- Package 50 pcs / color

SHARPENING MACHINE

LMRondoPlus™

Instruments used in treating hard tissue blunt quickly, naturally compromising efficiency and results. Periodontal instruments should be sharpened regularly.

■ Interactive demonstration and instruction CD and handy quick guide included!

Easy and quick

- Simple method - the blade is held in the correct sharpening position and the grinding stone rotates
- Sharpening one instrument only takes a few seconds

Versatile

- For both periodontal and preparation instruments
- For both right or left handed
- The direction of rotation can be selected

Accurate and safe

- A dual-position instrument rest. The upper position is for preparation instruments and the lower for periodontal instruments
- The original blade form is preserved
- Low rotational speed - the blade will not heat up nor will its temper be affected

The fine-grain ceramic stone is 400 grit. Finer and coarser sharpening stones are available as spare parts.

LM-RondoPlus™

LM 8600

Package includes:

Sharpening machine, foot pedal, 400 grit sharpening stone, 2 LM-Fingos™, 5 emery tapes, instruction CD and quick guide

On either side of the LM-RondoPlus™ there are LM-Fingo™ test sticks. Sharpness can be tested both with Fingo mounted on the LM-RondoPlus™ or your finger. The Fingo is made of an acrylic plastic and is sized to fit all users.

Spare Parts

Grinding stone

■ LM 8660 600 grit (white)

■ LM 8640 400 grit, coarser (grey)

■ LM 8632 320 grit, coarsest (black)

LM 8630 Foot pedal

LM 8550 Emery tapes, 5 pcs

LM 8602 LM-Fingo™ 2 pcs

LM 8606 LM-Fingo™, 6 pcs

LM™ INSTRUMENT REPROCESSING RECOMMENDATIONS

To take best care of your premium quality instruments

By following LM™ reprocessing recommendations, you can ensure your instruments to have both long life and high level performance. To take best care of your high-quality instruments pay attention to the recommendations and ensure that only validated procedures are used for cleaning and sterilization. For the hand instrument maintenance use LM-ServoMax™ tray system and LM-Servo™ cassettes in order to protect the instruments and avoid sharp injuries.

LM DTS™ FOR IMPROVED PATIENT SAFETY

With LM Dental Tracking System™ you can increase patient safety with automated evidence-based infection control checks, creating a verifiable human-first approach. LM DTS™ provides possibilities for infection control documentation, automated checks and alerts, material traceability, reprocessing process documentation and records of maintenance and sterilization procedures. For more information go to www.dentaltracking.com or contact your LM™ representative.

Go to www.lm-dental.com/REPROCESSING to read the recommendations
