

ICE TEA *Cold* BREW

www.dried-ingredients.de

The (r)evolution of tea

We have developed a technology that allows black tea, green tea, fruit tea and herbal tea to be infused with cold water.

- Genuine, honest iced tea made from dried tea, fruit, herbs, fruit juice concentrates and natural flavours.
- Brewed in just 15-20 minutes **with cold water** – stir enjoy.
- The tea components are germ-reduced and comply with THIE recommendations for cold brewed teas.
- The iced teas can also be sweetened with sugar or sweeteners (our recommendation: low sugar - only 3.5g/100 ml).
- Packaged in biodegradable paper filter bags for 500 ml (16 – 17 OZ) or 1 Litre (32 – 34 OZ) and for Food Service up to 2 or 4 Litre (1 Gallon) Bags.
- Simple handling. You don't need any machines, electricity or special know how. Just cold drinking water and a suitable container.
- The tea bag can remain in the container (the tea will steep a little more and become even stronger).
- Shelf live (dry Tea) 30 month

5 flavour options

Black Tea Lemon/Mint

Black Tea Hibiscus Peach

Green Tea Passionfruit/Mango/Peach

Green Tea Lemon

Fruit infusion Strawberry / Rhubarb

You have the market, we have the concept.

If you are interested - please contact us.

We offer our customers individual product developments and can recommend packers in Europe and the USA who can already pack this concept. Are you interested in the raw materials and would like to develop your own blends and mix and pack them yourself? We are also happy to offer you our cold brew teas as raw materials.
